## CHAPTER 1 – MAYOR'S FOREWORD AND EXECUTIVE SUMMARY

### COMPONENT A: MAYOR'S FOREWORD

Cllr. Bongwe, Joseph Sipho

The financial year 2011/2012 has been a year in which national government through COGTA took bold and decisive initiatives to intervene, stabilize and support local government. This comes as a result of key elements of the local government systems showing signs of distress. The state of local government report compiled following assessments jointly conducted across the country between April and August 2009 profiled Msukaligwa Municipality as one of the 58 local municipalities falling in class 3; Second highest performing.

This assessment further demanded that we design our own turnaround strategy. Maintenance master plans, upgrading informal settlements, revenue enhancement, and reduction of electricity and water losses, local economic development and basic service delivery are some of the priorities that are part of Msukaligwa Municipality Turnaround Strategy. We should not lose sight of these priorities if visible, tangible and positive changes are to be felt in all our rural and urban communities.

The appointment of the municipal manager towards the end of the financial year has brought stability in the administration, contributing positively to the realization of the priorities of our turnaround strategy. For the municipality to be efficient, effective, responsive and accountable, political and administrative interface is critical.

The adoption of both the spatial development framework and local development strategy by Council are also positive milestones.

This period has also been characterized by communities becoming restless because as a developmental local government we could not realize that consultation and listening to the views of stakeholders are as equally important as the provision of basic services.

The achievement and failures of 2011/2012 must inspire all municipal stakeholders: politicians, administrators, communities to re-shape and commit towards increased access to a wide range of basic services and more opportunities in the economy. Let me end by saying that *"Local government is everyone's business"*

# Chapter 1

## COMPONENT B: EXECUTIVE SUMMARY

### 1.1. MUNICIPAL MANAGER'S OVERVIEW

On behalf of the Msukaligwa Local Municipality it is a privilege indeed to give an account to the stakeholders of how far we have come in discharging our mandate. The report reflects mainly on the activities, achievements and challenges of the past financial year 2011/12.

The municipality is not well capitalized and needs to boost its liquidity level. The current pool of liquidity is insufficient hence it poses a challenge for the municipality to eliminate all the backlog pertaining to matters of service delivery.

Liquidity simply means the ability of the municipality to meet its debts as and when they fall due. Failure to do that will result in the total failure of the municipality as it would be forced into liquidation or be placed into administration as purported in the MSA 135.

The challenge of the low level of liquidity emanates from multiple factors such as:

- Non-payment of rates and taxes
- High cost of overheads
- Electricity losses due to illegal connections
- High prevalent rate of unemployment within the municipality which makes it difficult for the consumers to meet their financial obligations
- Non-implementation of the credit control measures
- Increased debtor's days outstanding
- Decreased cashbook balances; and
- Incurred Provision of bad debts which is not in line with the current payments level ; etc

Budget drives efficiency in any business and strives to keep the right balance of liquidity. Common sense dictates that if debts are not collected, many businesses will not be in a position to provide the required goods and services nor to honour its obligations. We therefore commit to be living true to the social contract with our people that this municipality delivers for the people, with people and for the people.

In conclusion, I wish to thank the staff members and Council for their guidance and contribution which ensured that Msukaligwa local municipality met its mandate despite budget constraints. I am also indebted to the Mighty Lord, Council and the Executive Mayor for their strategic input, guidance and leadership. It is important that we continue to run an efficient and effective municipality in order to deliver on our mandate.

# Chapter 1

## 1.2. MUNICIPAL FUNCTIONS, POPULATION AND ENVIRONMENTAL OVERVIEW

### INTRODUCTION TO BACKGROUND DATA

In its endeavor to improve service delivery, the municipality has through the District, MIG and other funding extended its services to rural/farms communities by providing water boreholes where farm owners consented to these services. It should however be noted that service provision at some rural/ farm areas become difficult due to resistance by farm/land owners which poses a challenge to the Municipality. All urban areas within the municipality have access to running water which includes informal settlements areas where water is provided through communal taps. The municipality has further endeavored to meet the millennium target of eradicating the bucket system by providing water borne sewerage system at Kwazanele extension 4 and VIP toilets at Silindile informal settlement. Urban migration is also posing a challenge especially in Ermelo with the increase of illegal squatting making it difficult for the municipality to render proper sanitation services and waste removal. The municipality is currently providing free basic water to its communities and subsidizing of indigent residents. The provision of free basic electricity still remains a challenge to the municipality while the indigent consumers are subsidized.

Housing the growing population more especially in Ermelo has also become a challenge as we have to dealing respect land and delivery In dealing with the informal settlements, the municipality has therefore identified pockets of land which have been formalized into formal residential areas and provision of basic services to these areas has been prioritized. New land for relocation of the informal settlement has also been identified and new sites established. Funding for procurement of land for residential purposes remains a challenge for the municipality therefore the municipality relies on funding from the DRDLR, DARDLA, COGTA and other funding institutions to assist in purchase of land.

Eradication of informal settlement is one of huge challenges of the municipality as this impacts on community health due to poor sanitary services, refuse removal and inaccessibility to some sections of the settlement as result of poor/none existence of roads. Therefore the issue of acquisition of land for housing purposes should be accelerated for the municipality to meet the millennium target for eradication of squatter settlements by 2014. Financial assistance should therefore be sought from the District and government departments to procure land for housing purposes.

The Department of Agriculture and Land Administration has offered assistance to municipality by funding the Township establishment at Wesselton extension 7 and Kwazanele Extension 6 for ± 620 and 500 sites respectively. This will assist a lot in minimizing the housing backlog within the municipality.

Arable land	Agricultural production, forestry, employment opportunities, economic development and poverty alleviation.

## 1.3. SERVICE DELIVERY OVERVIEW

### SERVICE DELIVERY INTRODUCTION

The municipality is responsible for delivery of basic services to its community in terms of the provisions of Schedule 4 Part B of the Constitution of the Republic of South Africa as well as Section 152 which provides for the object of Local Government which states that:

- (1) The objects of local government are:-
  - (a) to provide democratic and accountable government for local communities;
  - (b) to ensure the provision of services to communities in a sustainable manner;
  - (c) to promote social and economic development;
  - (d) to promote a safe and healthy environment; and
  - (e) to encourage the involvement of communities and community organisations in the matters of local government.
- (2) A municipality must strive, within its financial and administrative capacity, to achieve the objects set out in subsection (1)

# Chapter 1

## Proportion of households with access to basic services

### ACCESS TO BASIC SERVICES

As depicted in the diagram above, service delivery in respect of electricity, water, sanitation and waste collection has improved over the past four years. Communal water supply within 200m from dwellings has also been reduced as a result of formalization of most of the informal settlements and water is connected to the yards or houses where houses are built. There is quite a significant progress made in electricity connections to households except areas where houses were not yet completed and in the informal settlements that cannot be formalized. The biggest challenge regarding electricity is at farm areas where farm owners refuse to consent for the electrification of their farm dwellers houses as well as refusing to contribute towards the electrification.

Provision of VIP sanitation services to farm areas has improved as more households are gaining access to the VIP toilets and this process will continue until all farm dwellers have access to VIP toilets. About 25% of the households in farm areas do not have hygienic sanitation services of which provisions have been for the future years to provide VIP toilets for those communities.

With regard to waste collection, household waste is collected once a week in the various towns and townships of this municipality with the exception of Warburton and Sheepmoor due to lack of resources and dumping sites as well as the fact that communities at these areas are not billed for the services.

## 1.5. ORGANISATIONAL DEVELOPMENT OVERVIEW

### ORGANISATIONAL DEVELOPMENT PERFORMANCE

The municipality identified the following issues as organizational development issues to be addressed by the municipality for the 2011/2012 financial year:

Implementation of Batho Pele change management programme to ensure that employees change their attitude to improve service delivery by adopting the Batho Pele principles.

The Employment Equity Plan was developed and implemented effective from 1<sup>st</sup> July 2011 to 30<sup>th</sup> June 2016.

The Workplace Skills Plan was developed and implemented for 2011/2012 financial year including the granting of bursaries to employees to enhance their skills which will enable the organization to achieve its objectives.

Performance Management for employees was introduced in phases even though it was not successful due to the process of change management which has not been implemented.

The shortage of suitably qualified personnel hampered the achievement of organizational objectives.

# Chapter 1

## 1.6. AUDITOR GENERAL REPORT

### AUDITOR GENERAL REPORT 2010/11

The municipality has received an unqualified Audit Opinion with other matters. The other are matters are as follows:

- Governance framework
  - Key governance responsibility
- Report on other legal regularities requirement
  - Report on performance
  - The accounting officer's responsibility for the performance information
- None compliance with regulatory requirements
  - Content of the IDP i.t.o. section 26 (i) and 41 (i) (b) of the MSA.
  - Existence and functioning of a performance Audit Committee
  - Lack of implementation of performance management system

An action plan has been developed to address the issues raised by the AG. Some of the issues as indicated have been addressed in the 2011/2012 IDP.

### AUDITOR GENERAL REPORT 2010/11

The municipality has received a disclaimer Audit Opinion with other matters

## 1.7. STATUTORY ANNUAL REPORT PROCESS

No	Activity	Timeframe
1	Consideration of next financial year's Budget and IDP process plan. Except for the legislative content, the process plan should confirm in-year reporting formats to ensure that reporting and monitoring feeds seamlessly into the Annual Report process at the end of the Budget/IDP implementation period.	July
2	Implementation and monitoring of approved Budget and IDP commences (In-year financial reporting).	
3	Finalise 4 <sup>th</sup> quarter Report for previous financial year	
4	Submit draft 11/12 Annual Report to Internal Audit and Auditor-General	
5	Municipal entities submit draft annual reports to MM	
6	Audit/Performance committee considers draft Annual Report of municipality and entities (where relevant)	August
8	Mayor tables the unaudited Annual Report	
9	Municipality submits draft Annual Report including consolidated annual financial statements and performance report to Auditor General.	

# Chapter 1

10	Annual Performance Report as submitted to Auditor General to be provided as input to the IDP Analysis Phase	
11	Auditor General assesses draft Annual Report including consolidated Annual Financial Statements and Performance data	September - October
12	Municipalities receive and start to address the Auditor General's comments	November
13	Mayor tables Annual Report and audited Financial Statements to Council complete with the Auditor-General's Report	
14	Audited Annual Report is made public and representation is invited	
15	Oversight Committee assesses Annual Report	December
16	Council adopts Oversight report	
17	Oversight report is made public	
18	Oversight report is submitted to relevant provincial councils	January
19	Commencement of draft Budget/ IDP finalization for next financial year. Annual Report and Oversight Reports to be used as input.

## 2.2 ADMINISTRATIVE GOVERNANCE

### INTRODUCTION TO ADMINISTRATIVE GOVERNANCE

During the year 2011/2012 the Municipal Manager operated without a full staff complement of section 57 managers. He provided strategic guidance to the Municipality and assisted by the Director Corporate Services, Director Public Safety and the CFO who were appointed on fixed contract term basis. The position of the Director Technical Services was vacant but an internal employee was appointed to act as the Director Technical Services to carry out the function of Technical Services as dictated by the SDBIP. The position of the Director Community Services was also vacant but an internal employee was appointed to act as Director Community Services. It is the view of the Municipal Manager that not all the outcomes of the Municipality can be achieved with employees appointed with acting capacity.

The Senior Managers who were appointed on fixed term basis contributed to the Municipality in achieving some of the outcomes of the Municipality including the implementation of the turnaround strategy of the Municipality despite the fact that there were challenges facing the Municipality relating to the shortage of financial resources.

### ACHIEVEMENTS IN SERVICE DELIVERY

1. The function of the Public Safety Department namely: Fire Fighting, Disaster Management, Licensing, Traffic Management and Security Function were carried out satisfactorily.
2. The waste management function was carried out effectively including the maintenance of parks and commentaries.
3. A remarkable was made in Human Settlement Department. New RDP houses were built and informal settlement structures were reduced.
4. The collections of funds relating to the use of electricity improved when a service provider was appointed to cut electricity supply to Communities who connected electricity illegally.
5. Streets in Phumula Location were upgraded and noticeable number of pot holes were patched in some areas of Msukaligwa.
6. New water connection and Sewerage were made to several houses in Msukaligwa Municipality.
7. The process of sourcing service providers when tenders are advertised was implemented in terms of supply chain management and every effort was made to pay the service within period of 30 days.
8. The Municipality made a remarkable attempt to improve the collection of revenue.
9. Council Sitings took place in terms of predetermined schedule for council sittings.
10. There was an improved management of Human Resources in terms of the implementation of the Skills Development Strategy. Performance Management concept was introduced to employees on posts level 1 to 5. Batho- Pele Principles and change management programme were introduced to all the employees.

### CHALLENGES

1. Msukaligwa Municipality experienced challenges that hampered services delivery priority. Some areas in Msukaligwa did not have bulk water supply due to technical problems in the water reservoirs. Water leaks were noticed in some places.
2. There was noticeable tampering of pre- paid meters by some members of the Community, but the challenge was addressed by the engagement of the service provider to check on all pre- paid meters in Msukaligwa Municipality.
3. The Municipality experienced cash flow problem due to some members of the Community who are not paying their Municipal Account accordingly to the bill issued.
4. The Municipality could not fill all the budgeted vacant positions due to the shortage of financial resources.
5. The Municipality received a disclaimer audit opinion due to the non compliant to GRAP 17 on assets

# Chapter 2

# Chapter 2

## TOP ADMINISTRATIVE STRUCTURE

**MUNICIPAL MANAGER**  
Mr. T.B.W. Dlamini

### TIERS 2

#### DIRECTORS

Mr C A Habile  
DIRECTOR: Corporate Service

Ms T M Lengwate  
Director: Finance

Mr. D I Maluleke  
Director: Public Safety

Mr. V A Ngobese  
Acting Director: Community Services

Mr S R Magudulela  
Acting Director: Technical Services

Msukaligwa Municipality advertised for the following section 57 positions during the financial year 2011/2012:

1. Director Technical Services
2. Director Community Services

Applications were received but there were no suitable candidates for consideration. Therefore the two section 57 positions could not be filled.

# Chapter 2

## COMPONENT B: INTERGOVERNMENTAL RELATIONS

### 2.3 INTERGOVERNMENTAL RELATIONS

#### PROVINCIAL INTERGOVERNMENTAL STRUCTURE

Meetings attended include the **Provincial Planners Forum, District IDP Management Committee, District and Local IDP Rep Forum and District and Local Technical Committee Meetings.**

In Provincial Planners Forum, the planning cycles of the provincial government and the municipal planning cycles are discussed in order to have a common understanding on how these cycles complement each other and how best can municipal planning be timed to assist in contributing to the provincial planning process. These meetings have benefited the municipality to have a better understanding on how our planning cycles influence the proper planning of other spheres of government.

The District or Local forums and committees provide a platform for interaction on planning issues, information sharing and learning from best practices between municipalities and other spheres of government. There has been a great improvement on the packaging of our IDP and valuable information was obtained from these meetings or forums.

## COMPONENT C: PUBLIC ACCOUNTABILITY AND PARTICIPATION

#### OVERVIEW OF PUBLIC ACCOUNTABILITY AND PARTICIPATION

The municipality remains accountable to its constituent communities hence the importance of inculcating the culture of accountability and participatory governance. Service delivery priorities are being guided by the needs of the community, Provincial and National priorities, plans and directives while the municipality is accountable to render such services that fall within the functions of the municipality. The municipality is therefore held accountable through the IDP and the Service Delivery and Budget Implementation Plan (SDBIP) which are publicised for public interest. The public is through these documents able to hold the municipality accountable on the commitments made and to monitor progress against the set targets on service delivery.

With regard to participatory governance, the municipality has in collaboration with sector departments and other stakeholders established forums in which various stakeholders participate in planning, sharing information, decision making and implementation of plans. The forums and committees include amongst others the stakeholders representative forums like LED forum, IDP Rep forum, Communications forum, MM's forum, CFO's forum and other provincial, district and local technical committees established to ensure representative governance. It should also be noted that some of the forums are coordinated at both the district and local municipality level while some are coordinated either at local or district level only. We have over the past years experienced poor participation of government sectors in some of the forums and it has improved after the intervention of the provincial

### 2.4 PUBLIC MEETINGS

#### COMMUNICATION, PARTICIPATION AND FORUMS

Communication to the public on matter of public interest is communicated through various media as provided in terms Section 21 of the Municipal Systems Act, 2000. These include the use of local newspaper, radio broadcast, information pamphlets, notices on notices boards, loud hailing ward committee meetings and ward community meetings. Matters communicated to public are in most cases service delivery issues including the municipal plans, performance, developments, achievements, services interruptions and related matters. Various consultative forums have been established to ensure participation of the community and other stakeholders in the planning, implementation, monitoring and evaluation of service delivery programmes and projects. These forums include but not limited to LED forum, IDP Representative forum, Communicators Forum, Community Safety Forum, Ward Committees and other technical committees.

# Chapter 2

The starting point in the whole process of community participation is during the development of the IDP in which community meeting is held to give feedback to communities on the performance of the municipality in the past year as well as gathering information on new challenges and community priorities to assist the municipality in planning and allocation of resources. The information gathered forms the basis for the municipality's strategic planning which eventually guide the allocation of resources and preparation of the draft budget which is also consulted through community meetings and publications on print media. Public consultative are usually held after hours and during weekends to ensure maximum participation of community members and notices are given at least a week in advance through publication in newspapers and flyers. Loud hailing is done a day before a meeting to remind the community of the scheduled meeting.

The IDP Representative forum, chaired by the Executive Mayor, therefore plays an important role in that it creates a platform for consultation with various stakeholders wherein the performance of the IDP and the budget is discussed and monitored. It should also be borne in mind that there are other committees and forums that provide reports and recommendation to the IDP Representative forum and some of those forums have been mentioned above

## WARD COMMITTEES

The main objective of ward committees is to enhance participatory democracy in local government. They are made up of elected members of a ward to raise issues of concern about the local ward to the ward councillor and have a say in decisions, planning and projects the council or municipality undertakes which have an impact on the ward. The key issue address was to identify indigents and encourage them to register for the municipal grant as per municipal indigent policy. Refer to **Appendix E** which contains further details on ward committee governance and to **Appendix F** that contains performance data on a ward by ward basis

## COMMENT ON THE EFFECTIVENESS OF THE PUBLIC MEETINGS HELD:

The municipality and the public benefit from the meetings in that the municipality is able obtain priority service delivery issues within communities to assist in the planning process. These meetings also serves as platform for reporting back to communities on service delivery commitments made by the municipality as well as affording the public to air their views and concerns. The public contributions are therefore assisting the municipality to properly plan for the years ahead.

## 2.5 IDP PARTICIPATION AND ALIGNMENT

IDP Participation and Alignment Criteria*	Yes/No
Does the municipality have impact, outcome, input, output indicators?	Yes
Does the IDP have priorities, objectives, KPIs, development strategies?	Yes
Does the IDP have multi-year targets?	Yes
Are the above aligned and can they calculate into a score?	Yes
Does the budget align directly to the KPIs in the strategic plan?	Yes
Do the IDP KPIs align to the Section 57 Managers	Yes
Do the IDP KPIs lead to functional area KPIs as per the SDBIP?	Yes
Do the IDP KPIs align with the provincial KPIs on the 12 Outcomes	Yes
Were the indicators communicated to the public?	Yes
Were the four quarter aligned reports submitted within stipulated time frames?	Yes

# Chapter 2

## COMPONENT D: CORPORATE GOVERNANCE

### 2.6 RISK MANAGEMENT

#### RISK MANAGEMENT

The municipality needs to have system that is proactively and continuously identify, evaluate, analyse, measure and manage risks that might directly affect the municipality so that it is able to put in key controlling measures in addressing those risks. The risk management unit helps in identifying and putting measures as to contain, avoid or transfer the risk concerned. Currently there are systems in place to monitor the identified risks but there are residual risks that remain.

The following are the top five risks identified in the municipality:

- Inadequate performance management system;
- Lack of reliable, safe machinery in delivering effective services as expected by our community;
- Ineffective fleet management system;
- Disrupted business continuity; and
- Inadequate contract management.

### 2.7 WEBSITES

Municipal Website : Content and Currency of Material		
Documents published on the Municipality's / Entity's Website	<Yes / No>	Publishing Date
Current annual and adjustments budgets and all budget-related documents	Yes	21-June 2011
All current budget-related policies	Yes	03 August 2011
The previous annual report (2010/2011)	Yes	05 May 2010
The annual report (2011/2012) published/to be published	Yes	28 February 2012
All current performance agreements required in terms of section 57(1)(b) of the Municipal Systems Act (2008/09) and resulting scorecards	No	None
All service delivery agreements (2011/2012)	Yes	04 July 2012
All long-term borrowing contracts (2011/2012)	No	None
All supply chain management contracts above a prescribed value (give value) for 2011/2012	No	None
An information statement containing a list of assets over a prescribed value that have been disposed of in terms of section 14 (2) or (4) during 2011/2012	Yes	None
Contracts agreed in 2011/2012 to which subsection (1) of section 33 apply, subject to subsection (3) of that section	No	None
Public-private partnership agreements referred to in section 120 made in 2011/2012	Yes	04 November 2012

# Chapter 2

All quarterly reports tabled in the council in terms of section 52 (d) during 2011/2012	Yes	05 October 2012
---	-----	-----------------

## COMMENT MUNICIPAL WEBSITE CONTENT AND ACCESS:

It is axiomatic to note that communication is the strategic management function which operates within the confines of the constitutional imperatives in which both administrative and political responsibilities are strategically discharged as guided by the SALGA guidelines and GCIS standards to manage the flow of information in both the internal and external communication clusters of the municipality.

The allocation of financial resources in terms of budget prioritization in every financial year for all the communication activities to be implemented as enshrined in the Council Approved Policy and Communication Strategy are some of the worrying factors at the period in which the municipality is said to be operating under a very shoe-string budget as wrestling to realise its constitutional obligation such as the provision of basic services.

The challenge of unmediated communication, lack of integration and coordination amongst the municipal departments as well as the challenge of unfunded mandate in the communication environment are a few of the frustrations in hampering the performance of the communication section.

The communication clusters comprising of all the communicators in the Gert Sibande District had reached some greater heights in attempting to circumvent some of the fundamental challenges facing the communication components despite a myriad of requests for strategic intervention being made to other sector departments however the Gert Sibande District Department of Communications had been very helpful to the local municipalities.

The outsourcing of the Information Technology (IT) is still a cause for serious concern in the municipal website content management as there is no direct control in the operations of the Municipal website and intranet update, suggestions that IT Section should be amongst the fully fledged units in the organisational structure of the municipality will serve as a panacea to a number of jigsaw puzzles facing the municipality in which strategic planning is the key aspect of developmental communication.

# Chapter 3

## CHAPTER 3 – SERVICE DELIVERY PERFORMANCE (PERFORMANCE REPORT PART I)

### COMPONENT A: BASIC SERVICES

This component includes: water; waste water (sanitation); electricity; waste management; and housing services; and a summary of free basic services.

#### 3.1. WATER PROVISION

##### INTRODUCTION TO WATER PROVISION

Msukaligwa is a water services authority, and provide water to all households

Problems are experienced in some rural areas, ie Warburton due to the in consisted supply of existing boreholes

Long-term solutions are in the planning stage and is awaiting capital funding

Problems are experienced with available resources. Personnel, equipment and stock items are not always available thus creating delays in service delivery

No major water projects were done as a result of no funds in the 2011/2012 financial year

Old infrastructure causes regular pipe burst that affects constant supply of water to the residents

Total Use of Water by Sector (cubic meters)					
	Agriculture	Forestry	Industrial	Domestic	Unaccountable water losses
2010/11	0	0	0	4123689	27%
2011/12	0	0	0	4083861	29%

## 3.2 WASTE WATER (SANITATION) PROVISION

### INTRODUCTION TO SANITATION PROVISION

- Problems are experienced with available resources. Personnel, equipment and stock items are not always available thus creating delays in service delivery
- VIP toilets were installed in the rural areas
- Old infrastructure causes regular blockages and cause effluent overflows
- Due to budget constraints, the opening of blockages cannot be attended to immediately, and as a result of personnel, equipment and stock shortages, service delivery is not up to standard
- Any capital projects implemented are done from outside funding, as Council does not have enough funds

## 3.3 ELECTRICITY

### INTRODUCTION TO ELECTRICITY

The electrical infrastructure is ageing and needs refurbishment. The Master plan has been developed to address the operation and maintenance challenges. Council is the service provider in Ermelo, Wesselton, Kwa-Dela, Breyten and Silindile. The rest of the admin units in Msukaligwa get electricity from ESKOM.

Service delivery cannot be performed as required due to the following reasons:

- Lack of staff and equipment
- Limited funding from DoE for electrification of projects (RDP)
- Shortage of material at the stores that is needed for breakdowns
- No maintenance is taking place on the substations due to budget constraints

## 3.4 WASTE MANAGEMENT (THIS SECTION TO INCLUDE: REFUSE COLLECTIONS, WASTE DISPOSAL, STREET CLEANING AND RECYCLING)

### INTRODUCTION TO WASTE MANAGEMENT

The waste removal unit of the municipality renders solid waste removal from households, businesses, schools, health facilities and other community facilities. These services include cleaning of public open spaces and streets at both towns and townships. Household waste is removed on a weekly basis in accordance with the National Standards while removal at businesses takes place on a daily basis. Our landfill sites do not accommodate hazardous waste and therefore such industries make necessary arrangements with areas that cater for such waste. Industries producing such waste arrange their own transportation of the waste to the registered sites.

The municipality is currently operating one registered landfill site situated in Ermelo while the others are not registered due to areas they are situated in. The soil conditions of the said areas make it impossible to register such landfill sites. Due to the method in which waste is collected, it is impossible to do recycling at the landfill site hence private individuals collect some of the waste from residential and businesses for recycling.

# Chapter 3

## 3.5 HOUSING

### INTRODUCTION TO HOUSING

The Municipality is not yet accredited as a services provider for housing and we are currently assisting the Department of Human Settlement with the facilitation process for provision of houses.

The facilitation processes include the compilation and maintenance of the housing waiting list and the provision of land and sites for housing purposes. The Department of Human Settlements is responsible for approvals of beneficiaries, funding and implementation of the housing projects.

By the end of 2011/12 the potential beneficiaries on waiting list was at 7930 which implies that there is still quite a significant number of people awaiting to be housed. We have over the past year through the Department of Human Settlement managed to provide 513 low cost houses to the Community.

## 3.6 FREE BASIC SERVICES AND INDIGENT SUPPORT

### INTRODUCTION TO FREE BASIC SERVICES AND INDIGENT SUPPORT

The indigent household subsidy policy was approved as part of budget related policies in 28 May 2010. The municipality supported 9200 indigents in 2011/12 financial year. The municipality budgeted from equitable share to support indigents as follows:

- 6kl free water
- 50kw basic electricity
- Free refuse removal
- Free sanitation services

A total arrear debt of R23 085 354 in relation to indigent households consumers being balances on these accounts before being approved as indigent consumers was written off by municipal council.

The following table illustrates how the indigent households were supported in 2011/12

Table 6.7: Support to indigent households

Electricity	Water	Sewer	Refuse	Rates	Total Amount
9 200	38 682	9 200	9 200	9 200	10 901 824

# Chapter 3

## COMPONENT B: ROAD AND STORMWATER

This component includes: roads; transport; and waste water (storm water drainage).

### 3.7 ROADS AND STORM WATER MANAGEMENT

#### INTRODUCTION TO ROADS AND STORM WATER MANAGEMENT

Road access needs to be provided to all residents in Msukaligwa. Grants received from MIG and GSDM enables the Municipality to re-build gravel roads to a tar or paved surface. During the IDP process, projects are identified during community consultative meetings. Council takes final resolution on projects that will be implemented.

Council does not have enough resources to attend to all the backlogs as a result of budget constraints. Because of budget constraints, approximately 3 to 5 km's of roads can be constructed every year. Mayor roads projects were the re-building of Amsterdam road, re-building of road in Silindile, re-building of Pres. Fouche road. General continuous maintenance are done on Tar roads by means of re-surfacing and pothole repairs.

Storm water systems are cleaned and broken pipes replaced. Inlet structures are repaired and new inlet structures build. Gravel roads are graded continuously, and new gravel imported to repair roads.

Sidewalks are maintained by replacing broken concrete tiles, as well as constructing new sections where and when needed.

Gravel Roads Infrastructure				
	Total gravel roads	New gravel roads constructed	Gravel roads upgraded to asphalt	Gravel roads graded /maintained
2009/10	165	3	2	166

## 3.10 LOCAL ECONOMIC DEVELOPMENT (INCLUDING TOURISM AND MARKET PLACES)

### INTRODUCTION TO ECONOMIC DEVELOPMENT

The purpose of LED is to build up the economic capacity of a local area to improve its economic future and the quality of life for all.

Key stakeholders in LED planning, implementation and evaluation are:

- Government
- Private sector
- Community structures

The development of the LED strategy for Msukaligwa Local municipality was viewed as part of the broader LED Planning process and the development of this strategy took into account work previously done as well as the new developments.

The purpose of LED is to build up the economic capacity of a local area to improve its economic future and the quality of life for all.

Key stakeholders in LED planning, implementation and evaluation are:

- Government
- Private sector
- Community structures

#### The LED Vision Elements and Objectives:

Key Vision Elements:

- Creation of job opportunities and the empowerment of local communities.
- Accessible and readily available information for SMME development and support.
- Sustainable growth and development based on sectoral competitiveness of the local space.
- Addressing socio-economic challenges faced by local communities, such as poverty, unemployment and skills levels.
- Infrastructure development for local economic growth.

## COMPONENT D: COMMUNITY & SOCIAL SERVICES

### 3.11 LIBRARIES AND COMMUNITY FACILITIES

#### INTRODUCTION TO LIBRARIES AND COMMUNITY FACILITIES

The Public Libraries of Msukaligwa are a local gateway to knowledge, they provide a basic condition for lifelong learning, independent decision-making and cultural development of individual and social groups. The Libraries are established, supported and funded by Msukaligwa Municipality. The Provincial government assists in the provision of some functions such as purchasing of library material by allocating funds of such function. Msukaligwa Libraries provide access to information, knowledge and works of the imagination through a range of resources and services and are our libraries are equally available to all members of the community regardless of race, nationality, gender, religion, language, disability, economic and employment status and educational attainment.

The Libraries have been able to provide resources and services in variety of media to meet the needs of individuals and groups for education, information and personal development including recreation and leisure. They are constantly playing an important role in the development and maintenance of a democratic society by giving the individual access to a wide and varied range of knowledge, ideas and opinions. One of our achievements is to be able to create and strengthen the reading habits in children from early age. We have managed to engage schools when all the vicinities when these libraries operate to participate in activities of the libraries which are aimed enhancing and empowering them.

All Libraries are a local centre of information making all kinds of knowledge and information readily available to their users. One of our achievements as Msukaligwa Libraries we have managed to bridge a gap between the information rich and the information poor by providing public access to the Internet as well as providing information in traditional formats. We have that opportunity to be the electronic gateway to the information world. All eight libraries provides electronic corners in their libraries. These are sources of information which give free access to Internet, Personal Computers.

Msukaligwa Libraries therefore continue to be provide services which are aimed at meeting the needs of the local communities and operating within the context of those communities.

## 3.12 CEMETORIES AND CREMATORIALMS

### INTRODUCTION TO CEMETORIES & CREMATORIALMS

The top priorities of the municipality is provide burial space in relation to legislation and maintain them to the required standards, securing and fencing of the cemeteries and the enforcement of the by-laws. Msukaligwa municipality has 21 cemeteries of which 5 of them are still on operational state whereas 14 of them are closed. It is therefore imperative to provide community with burial facilities, that will able to meet the burial demand. We have during the 2011/12 financial year managed to fence 2 cemeteries.

## COMMENT ON THE PERFORMANCE OF CEMETORIES OVERALL:

The most top priority projects were to fence all the existing and new cemeteries as well as establishment of new cemeteries at those areas where there are no cemeteries. Most of the cemeteries have been fenced and only 27% of the existing cemeteries have not been fenced and they in our plans to be fenced. The only outstanding area without registered cemetery is Warburton/Nganga of which we are in the process of acquiring land for the establishment of a cemetery.

## COMPONENT E: ENVIRONMENTAL PROTECTION

### 3.15 BIO-DIVERSITY AND LANDSCAPE (INCL. OPEN SPACES AND SIDE WALKS)

#### INTRODUCTION BIO-DIVERSITY AND LANDSCAPE

This services ranges from the administration, development and upgrading of parks, maintenance of open spaces, parks, sidewalks, street trees and general cleanness of the town and its grounds. The main priorities in the parks division is to repair and replace all dilapidated playing ground facilities, maintenance of parks, sidewalks and municipal terrains. Due to financial constraints and staff shortage most of these priorities could not be met. Support is given to communities during the cleaning campaigns through provision of equipment and cleaning material.

#### SERVICE STATISTICS FOR BIO-DIVERSITY AND LANDSCAPE

The towns are divided into sections for the cleaning and cutting of grass as well as the general maintenance of parks and open spaces. Therefore the rotation on cutting of grass in parks, open spaces and sidewalks is completed on a monthly basis. Inadequate staff and equipment remains a challenge leading to some areas not attended to on time or as per maintenance plan.

## COMPONENT G: SECURITY AND SAFETY

This component includes: Police; fire; disaster management, licensing and control of animals, and control of public nuisances, etc.

### 3.19 TRAFFIC SERVICES

#### INTRODUCTION TO TRAFFIC SERVICES

The Traffic Department is responsible for traffic law enforcement and the administration thereof. This function also ensures the technical sustainability of roads traffic signs, signals and markings throughout the municipal area. The main focus is to ensure reduction on death rate, compliance to road rules and regulations and free flow of traffic. The following tasks were conducted to ensure improvement on our performance:

- High visible patrols
- Effective law enforcement
- Effective speed enforcement
- Attend to accident scenes
- Escort duties of funerals, abnormal loads, MEC and other dignitaries.
- Traffic education in schools
- Road blocks
- point duties
- Scholar patrols
- Other related traffic duties.

## COMMENT ON THE PERFORMANCE OF TRAFFIC SERVICES OVERALL:

The traffic department has challenges on budget constraints, chronic personnel shortages and outdated Traffic vehicles and equipment.

## 3.20 FIRE

### INTRODUCTION TO FIRE SERVICES

Msukaligwa Fire and Rescue Service are governed by legislation in the form of the FBA, which manages and controls the key performance areas associated with the Fire Services functionality through the design, development and alignment of policies, procedures, systems and controls guiding critical interventions and processes with respect to prevention and /or risk reduction and elimination and, providing advice, information and guidelines on mission critical initiatives related to legislative imperatives from a service delivery and community responsibility perspective with a view to improving understanding of the benefits of a preventative approach to protecting communities and maintaining a safe environment to the inhabitants of Msukaligwa Local Municipality.

The Fire and rescue services of the municipality are administered as follows and include:

Operations, Routine non-emergency services, Fire safety activities, Public Education and Awareness Programs.

# Chapter 3

## COMMENT ON THE PERFORMANCE OF FIRE SERVICES OVERALL:

### Summary of difficulties experience

The Fire and Rescue Services biggest difficulty experience was the old fire engine fleet. From the entire fleet of 9 fire engines only 2 vehicles was capable of running for the full 12 months. The rest of the fleet had an average break down time of between 20 – 30 + days per month.

This is causing frustration for fire management for not delivering to its optimal capacity.

### Summary of accomplishments

During the last year the Fire and Rescue Services have continued with the standardization of their operations across the entire municipal area. At the same time they have worked diligently to improve upon the Health and Safety factors affecting their operations.

A schedule of training needs was forwarded to the human resources section of training needs identified and it is envisaged that most of the fire fighters will attend all or some of the courses. This is a more realistic way of presenting needed courses to our staff while making the process inherently safer.

### Smart Goals Summary

The service will continue to update their legal agreements and by-laws to ensure they are at the most appropriate stage of readiness. Additionally improve upon existing capital funding to ensure a consistent long term stable level of funding has not been achieved. The Fire Services will strive to improve upon their training to enhance the Health and Safety of the Fire Fighters. Additionally, live fire training along with specialty skills training will be started.

During 2012/13 the Fire and Rescue Services will be petitioning for funding of additional fire engines and the opening of 4 additional fire stations in Msukaligwa.

Enhancing our emergency management capabilities is an on-going responsibility.

---

## 3.21 DISASTER MANAGEMENT

### INTRODUCTION TO DISASTER MANAGEMENT

The Disaster management unit of the municipality is responsible for the provision of an integrated and coordinated disaster management function that focuses on prevention, mitigation, preparedness and post-disaster recovery, and an effective and efficient customer care management service and allocate adequate resources to address identified security threats and risks.

### SERVICE STATISTICS FOR DISASTER MANAGEMENT

- # of disaster management awareness campaigns conducted = 13
- % of incidents attended to satisfactory = 100%
- # of advisory forum meetings held = 4
- # of calls handled per year = 13287
- % reduction of theft in the controlled areas = 86%

## 3.22 LICENSING

### INTRODUCTION TO LICENSING SERVICES

The licencing function of the municipality deals with services including registration and licensing of vehicles, testing of roadworthiness of vehicles and issuing of road worthiness certificates, conducting learners and driving licences tests, issuing of learners and drivers licences, issuing of professional driving permits, administering instructors' certificates and issuing of temporary and special permits. The top 3 priorities of the licensing division was to encrease the number of people tested for learners and driving licences, limit the number of unroadworthy vehicle on municipal and provincial/national roads and

# Chapter 3

maintain and ensure compliance of the National Road Traffic Act 93/1996.. In ensuring that the priorities are achieved, the municipality has employed two more examiners of driving licences and this has lead to improvement on the increase of number of people being tested for learners and driving licenses.

# Chapter 3

## COMPONENT H: SPORT AND RECREATION

### INTRODUCTION TO SPORT AND RECREATION

The section mandate is to provide, maintain and manage sports and recreational facilities. We further promote sports in Msukaligwa municipal as well as assisting athletes who participate at regional, provincial and national level, with transport and other logistical arrangements.

We are currently managing and maintaining 19 facilities that cuts across all sporting codes, only ermelo has resonable facilities while six units within the municipality are still having challenges.

We intend to source funding through the treasury equitable share (MIG), GSDM and the NLDTF, to enable us to built and upgrade facilities

**CHALLENGES :** Funding remains a major issue, followed by lack of facilities and personell, to train youth to participate in sports, personell to administer and manage sports.(resources)

Security for sports facilities: in most cases facilities aare vanadalised and and we need security to safe gurd the facilities(request made to department of public safety for provision of security personel)

### 3.23 SPORT AND RECREATION

#### SERVICE STATISTICS FOR SPORT AND RECREATION

The section is responsible for the following sporting codes which are mainly concentrated in Ermelo and Breyten:

Soccer; Rugby; Netball; Tennis; Korfball; Wrestling; Gymnastics; Basket ball; Volleyball; Swimming; Karate; Table tennis; Indigenous games and Cricket.

A detailed data information is still to be captured that include organised clubs and registered players with qualified trainers. 70% of the facilities are in Ermelo and they are at an acceptable level, while most in other units need a lot of upgrade and face lift.

## CHAPTER 4 – ORGANISATIONAL DEVELOPMENT PERFORMANCE

### (PERFORMANCE REPORT PART II)

#### INTRODUCTION

The function of organizational development in Msukaligwa Local Municipality consist of formulated Human Resource Policies which provide guidance to Management relating to the implementation of Employment Equity and the implementation of the Skills Development Strategies to enhance the skills of employees so that the organization can adapt to the external environment. Batho Pele change management programme is implemented to change the attitude of employees in terms of improved service delivery. The Municipality has introduced performance management to change the attitude, believes and work ethics of employees.

## COMMENT ON VACANCIES AND TURNOVER:

During 2011/12 financial year, senior management consisted of the Municipal Manager, Director Corporate Service, Director Public Safety and CFO. The position of Director Technical Service and the position of Director Community Services were advertised in national print media but no suitable candidates were identified amongst the candidates. Internal employees were appointed to act in the two positions to carry out the functions of the two departments which are community and technical services. The turnover rate of the municipality was determined at 3% for the whole financial year. The post of Director Technical Services and Director Community Services remained vacant for a period of one year.

## 5.3 ASSET MANAGEMENT

TREATMENT OF THE THREE LARGEST ASSETS ACQUIRED 2008/09				
Asset 1				
Name	Construction of water reticulation in New Ermelo			
Description	Water Reticulation			
Asset Type	Infrastructure- water network			
Key Staff Involved	MPU personnel			
Staff Responsibilities	Monitoring and evaluation of project			
	2008/09	2009/10	2010/11	2011/12
Asset Value			824,355	6,938,632
Capital Implications				

# Chapter 5

Future Purpose of Asset	Supply of water to communities in New Ermelo
Describe Key Issues	
Policies in Place to Manage Asset	Asset Management Policy

Asset 2				
Name	Upgrading of water treatment plant			
Description	Upgrading of water treatment plant and increase of storage capacity			
Asset Type	Infrastructure- water dams and reservoirs			
Key Staff Involved	MPU personnel			
Staff Responsibilities				
	2008/09	2009/10	2010/11	2011/12
Asset Value				3922889
Capital Implications				
Future Purpose of Asset	Supply of water to communities around Ermelo			
Describe Key Issues				
Policies in Place to Manage Asset	Asset Management Policy			

Asset 3				
Name	Refurbishment and upgrading of sewer treatment plant			
Description	Refurbishment of sewer treatment plant			
Asset Type	Infrastructure- sewer			
Key Staff Involved	MPU personnel			
Staff Responsibilities	Monitoring and evaluation of project			
	2008/09	2009/10	2010/11	2011/12
Asset Value			273613	3226368

## 5.11 PUBLIC PRIVATE PARTNERSHIPS

### COMPONENT D: OTHER FINANCIAL MATTERS

## 5.12 SUPPLY CHAIN MANAGEMENT

### SUPPLY CHAIN MANAGEMENT

The Municipality implemented a supply chain management policy in line with the provisions of Supply Chain Management Regulation. Procurement was done from SMME's as well as companies owned by youth and women. A supplier data base was completed in 2011/12 to enable easy of procurement of goods and services. The challenges the municipality has is that majority of companies are deregistered at CIPRO due to non submission of annual company registration returns. All tenders were awarded to previously disadvantaged individuals. The following officials on the supply chain management unit have not yet reached the minimum National competency level of qualification and still undergoing training:

Surname and Name	Position
Hlongwa Bongani	Manager Supply Chain Management
Mahlangu Prudence	Supply Chain Practitioner
Nkosi Nkululeko	Supply Chain Management Clerk

# Chapter 5

## 5.13 GRAP COMPLIANCE

### GRAP COMPLIANCE

The financial results of the 2011/12 year as presented in this report is based on unaudited information and will be updated as soon as the report of the Auditor General has been issued. In this report, both qualitative and quantitative information will be provided on the results of the year.

The annual financial statements are prepared on an accrual basis of accounting and are in accordance with historical cost convention. The annual financial statements have been prepared in accordance with the Standards of Generally Recognized Accounting Practice (GRAP) as prescribed by the Minister of Finance in terms of General Notice 991 and 992 of 2005. Some of these accounting policies are not consistent with all the accounting policies of the previous financial year, due to GRAP / GAAP conversion.

As far as it has been practicable, applicable standards have been adopted retrospectively and prior year figures have been restated to achieve comparability requirements.

DRAFT

MSUKALIGWA LOCAL MUNICIPALITY				
ACTION PLAN TO DEAL WITH ISSUES RAISED BY THE AUDITOR - GENERAL FOR THE YEAR ENDED 30 JUNE 2012				
CATEGORY	DETAILS	ACTION	IMPLEMENTING AGENT	TIMEFRAME
1. Accumulated Surplus	<p>1.1 The closing balance of the accumulated surplus of R292 683 926 in the financial statements differed from the closing balance of R124 993 in the general ledger. The municipality could not provide</p>	<p>1.1 Perform AFS and GL reconciliation.</p>	Chief Financial Officer	31 May 2013

# Chapter 6

	an explanation or supporting documentation for the difference of R292 558 933 included in the accumulated surplus amounting to R292 683 926, disclosed in the statement of changes in net assets.			
	1.2 The municipality could not provide sufficient appropriate audit evidence to support adjustments to a prior error amounting to R1 973 039 included in the accumulated surplus, disclosed in the statement of changes in net assets.	1.2 Ensure submission and proper record keeping of supporting documents on adjustments to prior year errors	Chief Financial Officer	31 May 2013
	1.3 I could not obtain sufficient appropriate audit evidence as to the existence, completeness and valuation of the accumulated surplus amounting to R292 683 926, disclosed in the statement of changes in net assets.	Ensure submission and proper record keeping of supporting documents on adjustments to prior year errors	Chief Financial Officer	31 May 2013
2. Inventories	2.1 Unable to physically verify consumable stores amounting to R21 093 070 to confirm the existence of these inventories	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
	2.2 Unable to physically verify unsold properties held for sale amounting to R4 359 290 to confirm the existence and completeness of these	Ensure that unsold properties have stand numbers in the asset register.	Chief Financial Officer	31 May 2013

# Chapter 6

	inventories		Chief Financial Officer	31 May 2013
	<p>2.3 GRAP 17 requires that major spare parts and standby equipment that the entity expects to use for more than one accounting period as well as parts and servicing equipment that can only be used in connection with a specific item of property, plant and equipment be capitalized and equipment be capitalized to property, plant and equipment. Significant components amounting to R4 005 025 were recorded as inventories instead of property, plant and equipment. Consequently, inventories are overstated and property, plant and equipment is understated by the said amount.</p>	Physical parts of more than one accounting period and transferred them to asset register.		
3. Other Receivables from non-exchange transactions	<p>3.1 The municipality could not provide sufficient appropriate evidence to support other receivables from exchange transactions amounting to R17 483 161 included in other receivables from exchange transactions, disclosed in note 10 to the financial statements. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the existence, rights, completeness and valuation</p>	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013

# Chapter 6

	of other debtors from non-exchange transactions amounting to R18 447 211, disclosed in note 10 to the financial statements.				
4. Consumer Receivables	<p>4.1 Unable to evaluate the reasonableness and consistency of the assumptions used in developing the collectability of debtors, I could not verify the method and procedures adopted to estimate the provision for doubtful debts amounting to R143 407 165. The municipality's records did not permit the application of alternative procedures as to the valuation of the closing balance of consumer receivables amounting to R71 189 058, disclosed in note 12 to the financial statements.</p> <p>4.2 The municipality could not provide sufficient appropriate audit evidence to support the debtors' impairment amounting to R17 844 467, disclosed in note 30 to the financial statements. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the existence, obligation, completeness and valuation of the debt impairment.</p>	Review method and assumptions made in calculation of provision for bad debts.	Chief Financial Officer	31 May 2013	
		Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013	

# Chapter 6

	amounting to R17 844 467, disclosed in note 30 to the financial statements.			
	4.3 Consumer receivables are understated by R15 300 890, as the debtors listing does not cast. Consequently, consumer receivables in the statement of financial position are overstated by R15 300 890.	Perform AFS and GL reconciliation.	Chief Financial Officer	31 May 2013
	4.4 Included in consumer receivables as shown in note 12 to the financial statements are credit balances recorded as unknown and Msukaligwa suspense accounts amounting to R8 341 263. Management did not provide a detailed breakdown and supporting documentation for the credit balances in these accounts. Consequently, I did not obtain sufficient appropriate evidence to satisfy myself as to the existence, rights, completeness and valuation of consumer receivables amounting to R71 189 058, disclosed in note 12 to the financial statements.	Perform AFS and GL reconciliation.	Chief Financial Officer	31 May 2013
	4.5 The gross debtors balance of R214 596 223 in the financial statements differed from the	Perform AFS and GL reconciliation.	Chief Financial Officer	31 May 2013

# Chapter 6

	gross debtors balance of R246 423 798 in the debtors age analysis. The municipality could not provide an explanation or supporting documentation for the difference of R31 827 576 included in consumer receivables amounting to R214 596 223, disclosed in note 12 to the financial statements.			
	4.6 At 30 June 2012, the municipality had receivables for consumer debtors totaling R143 407 165, as disclosed in note 12 to the financial statements, which had been outstanding for more than 12 months. The recoverability of these amounts is doubtful.	Ensure that long outstanding debtors are written off.	Chief Financial Officer	31 May 2013
5. Investment Properties	5.1 Unable to physically verify investment property amounting to R4 564 404, disclosed in note 4 to the financial statements, to confirm the existence and completeness of these assets.	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
6. Property, Plant and Equipment	6.1 In terms of the provisional transitional provisions for medium- and low-capacity municipalities as contained in Directive 4 of the Accounting Standards Board, medium-	Ensure that asset register is GRAP compliant	Chief Financial Officer	30 June 2013

# Chapter 6

	and low-capacity municipalities are expected to comply fully with GRAP 17, <i>Property, Plant and Equipment</i> , regarding the recognition, measurement and disclosure of their property, plant and equipment. The municipality did not perform an exercise to measure all of its assets by unbundling, componentizing and valuing its fixed assets in line with the requirements of the standard. I was unable to confirm the value of these properties by alternative means. Consequently, I was unable to satisfy myself as to the valuation of property, plant and equipment of R303 109 421, disclosed in the statement of financial position.			
	6.2 The closing balance of property, plant and equipment of R303 109 421 in the financial statements differed from the closing balance of R225 582 454 in the fixed asset register. The municipality could not provide an explanation or supporting documentation for the difference of R77 526 967 included in property, plant and equipment amounting to R303	Perform reconciliation of asset register and GL.	Chief Financial Officer	31 May 2013

# Chapter 6

	109 421, disclosed in note 5 to the financial statements.			
	6.3 The depreciation of property, plant and equipment of R27 747 080 in the financial statements differed from the depreciation of R0 in the fixed asset register. The municipality could not provide an explanation or supporting documentation for the difference of R27 747 080 included in property, plant and equipment amounting to R303 109 421, disclosed in note 5 to the financial statements.	Ensure asset register is GRAP compliant	Chief Financial Officer	31 May 2013
	6.4 The municipality could not provide sufficient appropriate audit evidence to support additions to property, plant and equipment amounting to R8 853 269 included in property, plant and equipment amounting to R303 109 421 at 30 June 2012, disclosed in note 5 to the financial statements.	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
	6.5 The municipality could not provide sufficient appropriate audit evidence to support work in progress amounting to R19 094 791 included in property, plant and equipment amounting to R303 109 421 at 30 June 2012, disclosed in	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013

# Chapter 6

	note 5 to the financial statements.				
	6.6 Unable to physically verify property, plant and equipment to confirm the existence and completeness of these assets due to limitations placed on the scope of my work by the municipality.	Ensure asset register is GRAP compliant	Chief Financial Officer	31 May 2013	
7. Retirement Benefit Obligation	7.1 Included in the retirement benefit obligation, as disclosed in note 8 to the financial statements, is an amount of R11 996 215 for the fair value adjustment to the retirement benefit obligation that was valued by actuaries in the current financial year and not measured retrospectively as per the GRAP 3 requirement for first-time full adoption of the standard. I was unable to determine the correct value of the corresponding figures in the financial statements. Consequently, I was unable to satisfy myself as the appropriateness of the corresponding amount of the provision as included in the corresponding amount of the retirement benefit obligation.	Ensure prior year retirement benefit obligations are revaluated.	Chief Financial Officer	31 May 2013	
8. Finance Lease Obligation	8.1 The municipality could not provide sufficient appropriate	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013	

# Chapter 6

	audit evidence to support the finance lease obligation amounting to R8 628 573, disclosed in note 15 to the financial statements. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the existence, obligation, completeness and valuation of the finance lease obligation amounting to R8 628 573, disclosed in note 15 to the financial statements.			
9. Payables from Exchange Transactions	<p>9.1 The municipality could not provide sufficient appropriate audit evidence to support payables from exchange transactions amounting to R15 418 014, included in note 18 to the financial statements. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the existence, obligation, completeness and valuation of the payables from exchange transactions amounting to R44 574 597, disclosed in note 18 to the financial statements.</p> <p>9.2 The closing balance of payables from exchange transactions of R44 574 597 in the financial statements differed from the closing</p>	Ensure submission and proper record keeping of supporting documents. # Chapter 6

	balance of R26 960 574 in the general ledger. The municipality could not provide an explanation or supporting documentation for the difference of R17 614 023 included in payables from exchange transactions amounting to R44 574 597, disclosed in note 18 to the financial statements.			
	9.3 The municipality could not provide sufficient audit evidence to support payments received in advance amounting to R8 036 375 included in payables from exchange transactions, disclosed in note 18 to the financial statements. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the existence, obligation, completeness and valuation of payables from exchange transactions amounting to R44 574 597, disclosed in note 18 to the financial statements.	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
10. Value-Added Tax (VAT) Payable	10.1 The municipality did not provide a reconciliation of the VAT payable amounting to R8 632 465, disclosed in note 19 to the financial statements. The municipality's records did	Perform VAT reconciliation and ensure it agree to GL.	Chief Financial Officer	31 May 2013

# Chapter 6

	not permit the application of alternative procedures. Consequently, I could not obtain sufficient appropriate audit evidence as to the valuation, obligations and completeness of the closing balance of the VAT payable amounting to R8 632 465, disclosed in note 19 to the financial statements.			
	10.2 The closing balance of the VAT payable of R8 632 465 in the financial statements differed from the closing balance of R237 561 in the general ledger. The municipality could not provide an explanation or supporting documentation for the difference of R8 394 904 included in the VAT payable amounting to R8 632 465, disclosed in note 19 to the financial statements.	Perform VAT reconciliation and ensure it agree to GL	Chief Financial Officer	31 May 2013
11. Revenue	11.1 The municipality could not provide sufficient appropriate audit evidence for grants and subsidies amounting to R39 331 049. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the occurrence, completeness and accuracy of government grants and subsidies	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013

# Chapter 6

	amounting to R59 002 036.			
	11.2 The municipality could not provide sufficient appropriate audit evidence for other income amounting to R11 243 622. Consequently, I did not obtain sufficient appropriate audit evidence to satisfy myself as to the occurrence, completeness and accuracy of other income amounting to R14 229 059, disclosed in notes 22, 24 and 26 to the financial statements.	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
	11.3 Distribution loss reconciliation for water sales was not performed. I could not obtain all the information and explanations I considered necessary to satisfy myself as to the completeness of water revenue of R17 959 531 included in total revenue amounting to R167 441 149, disclosed in the statement of financial performance.	Perform Distribution loss reconciliation for water and electricity Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer/ Director Engineering	31 May 2013
12. Expenditure	12.1 Could not obtain sufficient appropriate audit evidence as to the occurrence, completeness and accuracy of contracted services expenses amounting to R6 873 280 included in contracted services amounting to R20 200 556.	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013

# Chapter 6

	disclosed in note 35 to the financial statements.			
13. Commitments	<p>13.1 The municipality could not provide evidence to support commitments disclosed in the financial statements. There were no satisfactory alternative audit procedures that I could perform to obtain reasonable assurance that all commitments had been properly recorded. Consequently, I was unable to obtain sufficient appropriate audit evidence to satisfy myself as to the completeness and valuation of commitments amounting to R9 298 361, disclosed in note 38 to the financial statements.</p>	Ensure submission and proper record keeping of supporting documents.	Chief Financial Officer	31 May 2013
14. Cash Flow Statement	<p>14.1 Unable to obtain sufficient appropriate audit evidence as to the completeness and accuracy of the cash flow information, due to the numerous items contributing to the disclaimer of opinion that affected the items in the statement of financial position and the statement of financial performance.</p>	Ensure that statement of financial position and finance performance are accurate.	Chief Financial Officer	31 May 2013
15. Conditional Grant	<p>15.1 The municipality materially under-spent its conditional grant relating to the municipal infrastructure grant. At the</p>	Ensure that there is proper planning on capital projects.	MM, Director: Engineering, CFO	31 May 2013

# Chapter 6

	date of this report, under spending amounted to R11 902 104, as disclosed in note 16 to the financial statements, for which no satisfactory explanations could be provided. As a consequence, the municipality did not achieve its objective of delivering basic services.			
16. Supplementary explanations of Budget Variance	16.1 The supplementary explanations of budget variances contained on page xx to xx do not form part of the financial statements. I have not audited these explanations and accordingly I do not express an opinion thereon.	Ensure supplementary explanations of budget variances are contained in the AFS.	Chief Financial Officer	31 May 2013
17. Useful of Information (Presentation)	17.1 Improvement measures in the annual performance report for a total of 100% of the planned targets not achieved were not disclosed, as required by section 46 of the Municipal Systems Act of South Africa, 2000 (Act No. 32 of 2000) (MSA). This was due to inadequate internal control policies and procedures over the processes pertaining to the reporting of performance information.	Ensure disclosures of planned targets not achieved in the annual performance report.	Municipal Manager	31 May 2013
18. Reliability of selected development priorities	18.1 The FMPPi requires that processes and systems that	Ensure submission and proper record keeping of supporting documents and	Municipal Manager	31 May 2013

in the Annual performance report (Validity)	produce the indicator be verifiable. I was unable to obtain all the information and explanations I considered necessary to satisfy myself as to the validity of the actual reported performance relevant to 100% of the basic services objective and the public participation and goods governance objective. This was due to limitations placed on the scope of my work due to the absence of information systems and the municipality's records not permitting the application of alternative audit procedures.	ensure disclosure of methodology use in calculating performance.		
---	---	--	--	--

# Chapter 6

19. Reliability of selected development priorities in the Annual performance report (Accuracy)	19.1 The FMPPI requires that the indicator be accurate enough for its intended use and respond to changes in the level of performance. I was unable to obtain all the information and explanations I considered necessary to satisfy myself as to the accuracy of the actual reported performance relevant to 100% of the basic services objective and the public participation and goods governance objective. This was due to limitations placed on the scope of my work by the absence of information systems and the municipality's records not permitting the application of alternative audit procedures.	Ensure submission and proper record keeping of supporting documents and ensure disclosure of methodology use in calculating performance.	Municipal Manager	31 May 2013
20. Reliability of selected development priorities in the Annual performance report (Completeness)	The FMPPI requires that documentation addressing the systems and processes for identifying, collecting, collating, verifying and storing information be properly maintained. I was unable to obtain all the information and explanations I considered necessary to satisfy myself as to the completeness of the actual reported performance	Ensure submission and proper record keeping of supporting documents and ensure disclosure of methodology use in calculating performance	Municipal Manager	31 May 2013

# Chapter 6

	relevant to 100% of the basic services objective and the public participation and goods governance objective. This was due to limitations placed on the scope of my work by the absence of information systems and the municipality's records not permitting the application of alternative audit procedures.			
21. Achievement of Planned Targets	21.1 Of the total number of 148 planned targets, only 105 were achieved during the year under review. This means that 29% of the total planned targets were not achieved during the year under review. This was as a result of the institution not considering relevant systems and evidential requirements during the annual strategic planning process.	Ensure that planned targets are achieved and if not achieved, variances must be explained	Municipal Manager	31 March 2013
22. Compliance with laws and regulations (AFS, Performance and Annual Report)	22.1 The annual performance report for the year under review did not include a comparison with the previous financial year and the measures taken to improve performance, as required by section 46(1)(a), (b) and (c) of the MSA.  22.2 The financial statements submitted for auditing were not prepared in all material respects in accordance with	Ensure annual performance report include a comparison with the previous financial year.  Ensure the AFS for 2012/2013 will be prepared in all material respects in accordance with the requirements of section 122 of the MFMA	Municipal Manager and Chief Financial Officer  Chief Financial Officer	28 February 2013  31 August 2013

# Chapter 6

	the requirements of section 122 of the MFMA. Material misstatements in capital assets, current assets, liabilities, revenue, expenditure and disclosure items identified by the auditors were not corrected, resulting in the disclaimer of opinion.			
23. Compliance with laws and regulations (Asset and liability management)	23.1 An adequate management, accounting and information system was not in place to account for assets, as required by section 63(2)(a) of the MFMA.	23.1 Ensure adequate, accounting and information system will be in place to account for assets.	Chief Financial Officer	30 June 2013
	23.2 An effective system of internal control for assets (including an asset register) was not in place, as required by section 63(2)(c) of the MFMA.	23.2 Ensure effective system of internal control (including an asset register) is in place	Chief Financial Officer	30 June 2013
24. Budgets	24.1 The annual budget of the municipality was not based on the development priorities and objectives as well as the performance targets set by the municipality in its integrated development plan, as required by Municipal Planning and Performance Management Regulation 6.	24.1 Ensure the annual budget is based on the development priorities and objectives as well as the performance targets set by the municipality in its integrated development plan.	Municipal Manager, IDP Manager and Chief Financial Officer	31 May 2013

## Accounting Officer's Responsibilities and Approval

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Statements of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

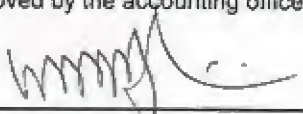

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable him to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2013 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The external auditors are responsible for independently reviewing and reporting on the municipality's annual financial statements. The annual financial statements have been examined by the municipality's external auditors and their report is presented on page 5.

The annual financial statements set out on pages 5 to 82, which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2012 and were signed on its behalf by:

Annual Financial Statements for the year ended 30 June 2012

## **Accounting Officer's Report**

---

The accounting officer submits his report for the year ended 30 June 2012.

### **1. Review of activities**

#### **Main business and operations**

Msukaligwa Local Municipality is a low capacity local municipality and delivers basic services such as water, electricity and refuse removal services to the Ermelo, Breyten, Wesselson, Lake Chrissie, Davel, Lothair, Sheepmoor and Warburton region.

The operating results and state of affairs of the municipality are fully set out in the attached annual financial statements and do not in our opinion require any further comment.

Net surplus of the municipality was R34 053 237 (2011: deficit R 1,527,839).

### **2. Going concern**

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

### **3. Subsequent events**

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

### **4. Accounting policies**

The annual financial statements have prepared in accordance with the effective Standards of Generally Recognised Accounting Practices (GRAP), including any interpretations, guidelines and directives issued by the Accounting Standards Board.

### **5. Auditors**

Auditor General - Mpumalanga will continue in office for the next financial period.

# **Msukaligwa Local Municipality**

Annual Financial Statements for the year ended 30 June 2012

## **Accounting Policies**

---

### **1. Presentation of annual financial statements**

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies which have been consistently applied are disclosed below.

These accounting policies are consistent with the previous period except for the changes set out in note 2 - Changes in accounting policy.

#### **1.1 Significant judgements and sources of estimation uncertainty**

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement are inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

##### **Trade receivables / Loans and receivables**

The municipality assesses its trade receivables and loans and receivables for impairment at each reporting date. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

##### **Fair value estimation**

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the municipality is the current bid price.

The fair value of financial instruments that are not traded in an active market (for example, over-the counter derivatives) is determined by using valuation techniques. The municipality uses a variety of methods and makes assumptions that are based on market conditions existing at the end of each reporting period. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments.

##### **Impairment testing**

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the key assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

The municipality reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value-in-use of tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including production estimates and service potential, together with economic factors such as exchange rates and inflation and interest.

##### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.1 Transfer of functions between entities under common control (continued)

#### Useful lives of property, plant and equipment and intangible assets

The municipality's management determines the estimated useful lives and related depreciation charges for property, plant and equipment and intangible assets. This estimate is based on the pattern in which an asset's future economic benefits or service potential are expected to be consumed by the municipality.

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The municipality determines the appropriate discount rate at the end of each reporting date. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the municipality considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in note 8 - Employee benefit obligations.

#### Effective interest rate

The municipality uses the government bond rate, taking into account guidance provided in the accounting standards, and applying professional judgement to the specific circumstances, to discount future cash flows.

#### Allowance for doubtful debts

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivable's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

### 1.2 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services;
- administrative purposes; or
- sale in the ordinary course of operations.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially measured at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired at no cost or for a nominal cost, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially to acquire the investment property and costs incurred subsequently to add to, or to replace a part of, or service the investment property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.2 Investment property (continued)

#### Cost model

Subsequent to initial measurement investment property is carried at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is provided to write down the cost, less estimated residual value, by equal installments over the useful life of the property, which is as follows:

Item	Useful life
Property - land	Indefinite
Property - buildings	30 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

### 1.3 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost or fair value of the item can be measured reliably.

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an item of property, plant and equipment is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired non-monetary asset's fair value is not determinable, it's deemed cost is the carrying amount of the asset given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, or to replace a part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.3 Property, plant and equipment (continued)

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Subsequent to initial measurement property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual values.

Subsequent to initial measurement property, plant and equipment are carried at cost less accumulated depreciation and any accumulated impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Infrastructure	
• Roads and motorways	10 - 15 years
• Traffic equipment	5 years
• Storm water drainage	20 years
• Airport infrastructure	20 years
• Solid waste	30 years
• Water and sanitation	20 years
• Major substations: buildings	30 years
• Transformers and related equipment	20 years
• Mains	20 years
• Street lighting	25 years
Community	
• Buildings	30 years
• Recreational facilities	30 years
Other property, plant and equipment	
• Buildings	30 years
• Markets and informal markets	30 years
• Fire engines	20 years
• Landfill sites	5 years
• Car parks	20 years
• Building improvements	30 years
• Heavy and mobile plant	10 - 15 years
• Furniture and fittings	7 - 10 years
• Vehicles	5 - 7 years
• Bins and containers	5 - 10 years
• Plant - general	2 - 5 years
• Security systems	3 years
• Office equipment	3 - 7 years
• Other items of plant and equipment	2 - 5 years

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.3 Property, plant and equipment (continued)

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

### 1.4 Intangible assets

An asset is identified as an intangible asset when it:

- is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially measured at cost.

Where an intangible asset is acquired at no cost or for a nominal cost, its cost is its fair value as at the date of acquisition.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale;
- there is an intention to complete and use or sell it;
- there is an ability to use or sell it;
- it will generate probable future economic benefits or service potential;
- there are available technical, financial and other resources to complete the development and to use or sell the asset; and
- the expenditure attributable to the asset during its development can be measured reliably.

Subsequent to initial measurement intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their expected useful lives to their estimated residual value, if any.

The amortisation period, residual value, if any, and the amortisation method for intangible assets are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

The useful lives of intangible assets have been assessed as follows:

Item	Useful life
Computer software	5 years

---

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.4 Intangible assets (continued)

Intangible assets are derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible asset is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the intangible asset. Such difference is recognised in surplus or deficit when the intangible asset is derecognised.

### 1.5 Heritage assets

Heritage assets are assets that have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

#### Recognition

A heritage asset is recognised when, it is probable that future economic benefits or service potential associated with the asset will flow to the municipality, and the cost or fair value of the asset can be measured reliably.

#### Initial measurement

Heritage assets are initially measured at cost.

Where a heritage asset is acquired at no cost or for a nominal cost, or through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

#### Subsequent measurement

Subsequent to initial measurement heritage assets are carried at cost less any accumulated impairment losses.

#### Impairment

The municipality assesses at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the municipality estimates the recoverable amount or the recoverable service amount of the heritage asset.

### 1.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the municipality designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.6 Financial instruments (continued)

- instruments held for trading. A financial instrument is held for trading if:
  - It is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Classification

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Stand loans	Measured at amortised cost
Consumer debtors	Measured at amortised cost
Cash and cash equivalents	Measured at amortised cost

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Finance lease obligation	Financial liability measured at amortised cost
Trade and other payables	Financial liability measured at amortised cost
Other financial liabilities	Financial liability measured at amortised cost

#### Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

#### Initial measurement

The municipality measures a financial asset and financial liability other than those subsequently measured at fair value, at amortised cost initially at its fair value, plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Except for the concessionary loan agreement, the municipality measures all other financial assets and financial liabilities at its fair value.

When the municipality enters into a concessionary loan agreement, it first assesses whether the substance of the concessionary loan is in fact a loan. On initial recognition, the municipality analyses a concessionary loan into its component parts and accounts for each component separately. The municipality accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.6 Financial instruments (continued)

#### Subsequent measurement

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.

All financial assets measured at amortised cost, are subject to an impairment review.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectibility.

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

#### Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is:

- a combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the municipality cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. The instrument is then reclassified from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the municipality reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the municipality reclassifies the instrument from cost to fair value.

#### Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### Impairment and uncollectibility of financial assets

The municipality assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.6 Financial instruments (continued)

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Where financial assets are impaired through use of an allowance account, the amount of the loss is recognised in surplus or deficit within operating expenses. When such assets are written off, the write off is made against the relevant allowance account. Subsequent recoveries of amounts previously written off are credited against operating expenses.

#### Derecognition

##### Financial assets

The municipality derecognises financial assets using trade date accounting.

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality :
  - derecognise the asset; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

##### Financial liabilities

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

# **Msukaligwa Local Municipality**

Annual Financial Statements for the year ended 30 June 2012

## **Accounting Policies**

---

### **1.6 Financial instruments (continued)**

#### **Presentation**

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the municipality currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

### **1.7 Leases**

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### **Finance leases - lessee**

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are recognised separately as an expense in the period in which they are incurred.

#### **Operating leases - lessor**

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term. The difference between the amounts recognised as revenue and the contractual receipts are recognised as an operating lease asset or liability.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Any contingent rent is recognised separately as revenue when received or receivable and are not straight-lined over the lease term.

#### **Operating leases - lessee**

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis over the lease term.

Any contingent rent is recognised separately as an expense when paid or payable and are not straight-lined over the lease term.

### **1.8 Inventories**

Inventories are initially measured at cost except where inventories are acquired at no cost, or for nominal consideration, then their costs are their fair value as at the date of acquisition.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.8 Inventories (continued)

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for:

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

### 1.9 Impairment of cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

#### Identification

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

Irrespective of whether there is any indication of impairment, the municipality also tests a cash-generating intangible asset with an indefinite useful life or a cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset is tested for impairment before the end of the current reporting period.

#### Value in use

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.9 Impairment of cash-generating assets (continued)

#### Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Recognition and measurement (cash-generating unit)

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

## Accounting Policies

---

### 1.9 Impairment of cash-generating assets (continued)

#### Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

#### Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

### 1.10 Impairment of non-cash-generating assets

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Non-cash-generating assets are assets other than cash-generating assets.

#### Identification

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

Irrespective of whether there is any indication of impairment, the entity also tests a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset is tested for impairment before the end of the current reporting period.

## Accounting Policies

---

### 1.10 Impairment of non-cash-generating assets (continued)

#### Value in use

Value in use of an asset is the present value of the asset's remaining service potential.

The present value of the remaining service potential of an asset is determined using the following approach:

#### Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the municipality would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

#### Service units approach

The present value of the remaining service potential of the asset is determined by reducing the current cost of the remaining service potential of the asset before impairment, to conform to the reduced number of service units expected from the asset in its impaired state. The current cost of replacing the remaining service potential of the asset before impairment is determined as the depreciated reproduction or replacement cost of the asset before impairment, whichever is lower.

#### Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.10 Impairment of non-cash-generating assets (continued)

#### Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

### 1.11 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the municipality recognises that excess as an asset (prepaid expense) to the extent that the prepayment will be lead to, for example a reduction in future payments or a cash refund; and,
- as an expense, unless another standard of GRAP requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The municipality measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance, and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative, but to make the payments.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.11 Employee benefits (continued)

#### Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the municipality during a reporting period, the municipality recognizes the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, the municipality recognizes that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard of GRAP requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation. Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Actuarial gains and losses comprise experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred) and the effects of changes in actuarial assumptions. In measuring its defined benefit liability the municipality recognizes actuarial gains and losses in surplus or deficit in the reporting period in which they occur.

Past service cost is the change in the present value of the defined benefit obligation for employee service in prior periods, resulting in the current period from the introduction of, or changes to, post-employment benefits or other long-term employee benefits. Past service cost may be either positive (when benefits are introduced or changed so that the present value of the defined benefit obligation increases) or negative (when existing benefits are changed so that the present value of the defined benefit obligation decreases). In measuring its defined benefit liability the municipality recognizes past service cost as an expense in the reporting period in which the plan is amended.

The amount recognized as a defined benefit liability is the net total of the following amounts:

- the present value of the defined benefit obligation at the reporting date;
- minus the fair value at the reporting date of plan assets (if any) out of which the obligations are to be settled directly;
- plus any liability that may arise as a result of a minimum funding requirement.

The amount determined as a defined benefit liability may be negative (an asset). The municipality measures the resulting asset at the lower of:

- the amount determined above; and
- the present value of any economic benefits available in the form of refunds from the

plan or reductions in future contributions to the plan. The present value of these economic benefits is determined using a discount rate which reflects the time value of money.

Any adjustments arising from the limit above is recognized in surplus or deficit.

The municipality determines the present value of defined benefit obligations and the fair value of any plan assets with sufficient regularity such that the amounts recognized in the financial statements do not differ materially from the amounts that would be determined at the reporting date.

The municipality recognizes the net total of the following amounts in surplus or deficit, except to the extent that another Standard of GRAP requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

## Accounting Policies

---

### 1.11 Employee benefits (continued)

#### Other post retirement obligations

The municipality provides post-retirement medical care benefits upon retirement to some retirees and their legitimate spouses.

The entitlement to post-retirement health care benefits is based on the employee remaining in service up to retirement age and the completion of a minimum service period. The amount recognised in the statement of financial position represents the present value of the defined contribution obligation. The amount is discounted by using the market related interest rate at the reporting date.

### 1.12 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
  - the activity/operating unit or part of a activity/operating unit concerned;
  - the principal locations affected;
  - the location, function, and approximate number of employees who will be compensated for services being located;
  - the expenditures that will be undertaken; and
  - when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note 39 - Contingencies.

## Accounting Policies

---

### 1.13 Revenue from exchange transactions

Exchange transactions are transactions in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

#### Interest, royalties and dividends

Revenue arising from the use by others of municipality assets yielding interest, royalties and dividends is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

### 1.14 Revenue from non-exchange transactions

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Conditions on transferred assets are stipulations that limits the purpose of which a transferred asset may be used, but do not specify that the future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.14 Revenue from non-exchange transactions (continued)

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have been met, a liability is recognised.

#### Impairment

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

#### Transfers

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

#### Debt forgiveness and assumption of liabilities

The municipality recognises revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the fair value of the debt forgiven. Where debt is carried at a value other than fair value, the receivable is recognised at the carrying amount.

#### Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fines will not be revenue of the collecting entity.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.14 Revenue from non-exchange transactions (continued)

#### Rates, including collection charges and penalties interest

Revenue from rates, including collection charges and penalty interest, is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- there has been compliance with the relevant legal requirements.

Changes to property values during a reporting period are valued by a suitably qualified valuator and adjustments are made to rates revenue, based on a time proportion basis. Adjustments to rates revenue already recognised are processed or additional rates revenue is recognised.

#### Gifts and donations, including goods and services in-kind

Gifts and donations, including goods in-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Services in-kind are not recognised.

#### Levies

Levies are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

Changes to estimates made when more reliable information become available are processed as an adjustment to levies due.

Levies are based on declarations completed by levy payers. The estimate of levies revenue when a levy payer has not submitted a declaration are based on the following factors:

- the extent and success of procedures to investigate the non-submission of a declaration by defaulting levy payers;
- internal records maintained of historical comparisons of estimated levies with actual levies received from individual levy payers;
- historical information on declarations previously submitted by defaulting levy payers; and
- the accuracy of the database of levy payers as well as the frequency by which it is updated for changes.

### 1.15 Investment Income

Investment income is recognised on a time-proportion basis using the effective interest method.

### 1.16 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of that asset until such time as the asset is ready for its intended use. The amount of borrowing costs eligible for capitalisation is determined as follows:

- Actual borrowing costs on funds specifically borrowed for the purpose of obtaining a qualifying asset less any investment income on the temporary investment of those borrowings.
- Weighted average of the borrowing costs applicable to the municipality on funds generally borrowed for the purpose of obtaining a qualifying asset. The borrowing costs capitalised do not exceed the total borrowing costs incurred.

The capitalisation of borrowing costs commences when all the following conditions have been met:

- expenditures for the asset have been incurred;
- borrowing costs have been incurred; and
- activities that are necessary to prepare the asset for its intended use or sale are undertaken.

When the carrying amount or the expected ultimate cost of the qualifying asset exceeds its recoverable amount or recoverable service amount or net realisable value, the carrying amount is written down or written off in accordance with the accounting policy on Impairment of Assets as per accounting policy number 1.15 and 1.16. In certain circumstances, the amount of the write-down or write-off is written back in accordance with the same accounting policy.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.16 Borrowing costs (continued)

Capitalisation is suspended during extended periods in which active development is interrupted.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

When the municipality completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the entity ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

All other borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.17 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### 1.18 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.19 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned. Additional text

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register. Additional text Additional

Annual Financial Statements for the year ended 30 June 2012

## Accounting Policies

---

### 1.20 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.21 Budget information

A reconciliation between the statement of financial performance and the budget has been included in the annual financial statements, as the recommended disclosure as determined by National Treasury, as the annual financial statements and the budget are not on the same basis of accounting. Refer to note 48 - Reconciliation between budget and statement of financial performance.

### 1.22 Capital commitments

Items are classed as commitments where in the municipality commits itself to future transactions that will normally results in the outflow of resources.

Capital commitments are not recognised in the statement of financial position as a liability, but are included in the disclosure notes in the following cases:

- approved and contracted commitments;
- where the expenditure has been approved and contract has been awarded at the reporting date;
- where the disclosure is required by a specific standard of GRAP.

### 1.23 Presentation currency

These annual financial statements are presented in South African Rand.

### 1.24 Offsetting

Assets, liabilities, revenue and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

### 1.25 Related parties

The municipality operates in an economic sector currently dominated by entities directly or indirectly owned by the South African Government. As a consequence of the constitutional independence of the three spheres of government in South Africa, only entities within the local sphere of government are considered to be related parties.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the entity in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

## Notes to the Annual Financial Statements

---

Figures in Rand	2012	2011
-----------------	------	------

---

### 2. Changes in accounting policy

The annual financial statements have been prepared in accordance with Generally Recognised Accounting Practice on a basis consistent with the prior year except for the adoption of the following new or revised standards,

- GRAP 104: Financial Instruments

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## 2. Changes in accounting policy (continued)

### Financial Instruments

During the year, the municipality changed its accounting policy with respect to the treatment of financial instruments. In order to conform with the benchmark treatment in of GRAP104 – Financial Instruments. The municipality now recognises financial instruments at fair value or amortised cost. The comparative figures have been restated retrospectively.

## 3. New standards and interpretations

### 3.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

### 3.2 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

#### GRAP 23: Revenue from Non-exchange Transactions

Revenue from non-exchange transactions arises when the municipality receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as recognise an amount equal to that reduction.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has early adopted the standard for the first time in the 2012 annual financial statements.

The impact of the standard is not material.

### 3.3 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are only mandatory for the municipality's accounting periods beginning on or after 01 July 2012 or later periods:

#### GRAP 24: Presentation of Budget Information in the Financial Statements

The municipality should present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- the approved and final budget amounts;
- the actual amounts on a comparable basis; and
- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where the municipality prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'statement of comparison of budget and actual amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual;
- include the same activities and entities;
- use the same classification system; and
- are prepared for the same period.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has early adopted the standard for the first time in the 2012 annual financial statements.

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

The impact of the standard is not material.

#### **GRAP 103: Heritage Assets**

GRAP 103 defines heritage assets as assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

The standard required judgment in applying the initial recognition criteria to the specific circumstances surrounding the entity and the assets.

GRAP 103 states that a heritage asset should not be depreciated but an entity should assess at each reporting date whether there is an indication that it may be impaired.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has early adopted the standard for the first time in the 2012 annual financial statements.

The impact of the standard is not material.

#### **GRAP 21: Impairment of Non-cash-generating Assets**

Non-cash-generating assets are assets other than cash-generating assets.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- Depreciated replacement cost approach
- Restoration cost approach
- Service units approach

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has early adopted the standard for the first time in the 2012 annual financial statements.

The impact of the standard is not material.

#### **GRAP 26: Impairment of Cash-generating Assets**

Cash-generating assets are those assets held by an municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The effective date of the standard is for years beginning on or after 01 April 2012.

The municipality has early adopted the standard for the first time in the 2012 annual financial statements.

The impact of the standard is not material.

#### **GRAP 25: Employee Benefits**

The objective of GRAP 25 is to prescribe the accounting and disclosure for employee benefits.

GRAP 25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality has early adopted the standard for the first time once it becomes effective.

The impact of the standard is not material.

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

#### GRAP 104: Financial Instruments

The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that results in a financial asset in one municipality and a financial liability or residual interest in another municipality. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

Financial assets and financial liabilities are initially recognised at fair value. Where the municipality subsequently measures financial assets and financial liabilities at amortised cost or cost, transactions costs are included in the cost of the asset or liability.

Concessionary loans are loans either received by or granted to another municipality on concessionary terms, e.g. at low interest rates and flexible repayment terms. On initial recognition, the fair value of a concessionary loan is the present value of the agreed contractual cash flows, discounted using a market related rate of interest for a similar transaction. The difference between the proceeds either received or paid and the present value of the contractual cash flows is accounted for as non-exchange revenue by the recipient of a concessionary loan in accordance with Standard of GRAP on Revenue from Non-exchange Revenue Transactions (Taxes and Transfers), and using the Framework for the Preparation and Presentation of Financial Statements (usually as an expense) by the grantor of the loan.

Financial assets and financial liabilities are subsequently measured either at fair value or, amortised cost or cost. The municipality measures a financial instrument at fair value if it is:

- a derivative;
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract;
- held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value;
- an investment in a residual interest for which fair value can be measured reliably; and
- other instruments that do not meet the definition of financial instruments at amortised cost or cost.

GRAP 104 requires extensive disclosures on the significance of financial instruments for the municipality's statement of financial position and statement of financial performance, as well as the nature and extent of the risks that the municipality is exposed to as a result of its annual financial statements. Some disclosures, for example the disclosure of fair values for instruments measured at amortised cost or cost and the preparation of a sensitivity analysis, are encouraged rather than required.

GRAP 104 does not prescribe principles for hedge accounting. The municipality is permitted to apply hedge accounting, as long as the principles in IAS 39 are applied.

This standard has been approved by the Accounting Standards Board but its effective date has not yet been determined by the Minister of Finance.

The municipality has early adopted the standard for the first time once it becomes effective.

The impact of the amendment is set out in note 2 Changes in Accounting Policy.

#### IGRAP 2: Changes in Existing Decommissioning, Restoration and Similar Liabilities

The interpretation applies to changes in the measurement of any existing decommissioning, restoration or similar liability that is both:

- recognised as part of the cost of an item of property, plant and equipment in accordance with the Standard of GRAP on Property, Plant and Equipment (as revised in 2010); and
- recognised as a liability in accordance with the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets (as revised in 2010).

The interpretation addresses how the effect of the following events that change the measurement of an existing decommissioning, restoration or similar liability should be accounted for:

- a change in the estimated outflow of resources embodying economic benefits (e.g. cash flows) or service potential required to settle the obligation;
- a change in the current market-based discount rate as defined in paragraph .52 of the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets (as revised in 2010) (this includes changes in the time value of money and the risks specific to the liability); and
- an increase that reflects the passage of time (also referred to as the unwinding of the discount).

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 3: Determining Whether an Arrangement Contains a Lease**

This Interpretation of the Standards of GRAP does not apply to arrangements that are, or contain, leases excluded from the scope of the Standard of GRAP on Leases (as revised in 2010).

The issues addressed in this Interpretation of the Standards of GRAP are:

- how to determine whether an arrangement is, or contains, a lease as defined in the Standard of GRAP on Leases (as revised in 2010);
- when the assessment or a reassessment of whether an arrangement is, or contains, a lease should be made; and
- if an arrangement is, or contains, a lease, how the payments for the lease should be separated from payments for any other elements in the arrangement.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 4: Rights to Interests Arising from Decommissioning, Restoration and Environmental Rehabilitation Funds**

This Interpretation of the Standards of GRAP applies to accounting in the financial statements of a contributor for interests arising from decommissioning funds that have both of the following features:

The issues addressed in this Interpretation of the Standards of GRAP are:

- the assets are administered separately (either by being held in a separate legal entity or as segregated assets within another entity); and
- a contributor's right to access the assets is restricted.

A residual interest in a fund that extends beyond a right to reimbursement, such as a right to distributions once all the decommissioning has been completed or on winding up the fund, may be an equity instrument within the scope of the Standard of GRAP on Financial Instruments and is not within the scope of this Interpretation of the Standards of GRAP.

The issues addressed in this Interpretation of the Standards of GRAP are:

- how should a contributor account for its interest in a fund?
- when a contributor has an obligation to make additional contributions, for example, in the event of the liquidation of another contributor, how should that obligation be accounted for?

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 5: Applying the Restatement Approach under the Standard of GRAP on Financial Reporting in Hyperinflationary Economies**

This Interpretation of the Standards of GRAP provides guidance on how to apply the requirements of the Standard of GRAP on Financial Reporting in Hyperinflationary Economies (as revised in 2010) in a reporting period in which an entity identifies the existence of hyperinflation in the economy of its functional currency, when that economy was not hyperinflationary in the prior period, and the entity therefore restates its financial statements in accordance with the Standard of GRAP on Financial Reporting in Hyperinflationary Economies (as revised in 2010).

The questions addressed in this Interpretation of the Standards of GRAP are:

---

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

- how should the requirement '... stated in terms of the measuring unit current at the reporting date' in paragraph .10 of the Standard of GRAP on Financial Reporting in Hyperinflationary Economies (as revised in 2010) be interpreted when an entity applies the Standard of GRAP?
- a contributor's right to access the assets is restricted.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

### **IGRAP 6: Loyalty Programmes**

This Interpretation of the Standards of GRAP applies to customer loyalty award credits that:

- an entity grants to its customers as part of a transaction, i.e. a sale of goods, rendering of services, use by a customer of entity assets; and
- subject to meeting any further qualifying conditions, the customers can redeem in the future for free or discounted goods or services.

The Interpretation of the Standards of GRAP addresses accounting by the entity that grants award credits to its customers.

The issues addressed in this Interpretation of the Standards of GRAP are:

- whether the entity's obligation to provide free or discounted goods or services ('awards') in the future should be recognised and measured by
  - allocating some of the consideration received or receivable from the sales transaction to the award credits and deferring the recognition of revenue (applying the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010) and the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers); or
  - providing for the estimated future costs of supplying the awards; and
- if consideration is allocated to the award credits:
  - how much should be allocated to them;
  - when revenue should be recognised; and
  - if a third party supplies the awards, how revenue should be measured.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

### **IGRAP 7: The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction**

This Interpretation of the Standards of GRAP applies to all post-employment defined benefits and other long-term employee defined benefits.

For the purpose of this Interpretation of the Standards of GRAP, minimum funding requirements are any requirements to fund a post-employment or other long-term defined benefit plan.

The issues addressed in this Interpretation of the Standards of GRAP are:

- When refunds or reductions in future contributions should be regarded as available in accordance with paragraph .68 of the Standard of GRAP on Employee Benefits.
- How a minimum funding requirement might affect the availability of reductions in future contributions

The Interpretation of the Standards of GRAP addresses accounting by the entity that grants award credits to its customers.

The effective date of the interpretation is for years beginning on or after 01 April 2013.

The municipality has early adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

#### **IGRAP 8: Agreements for the Construction of Assets from Exchange Transactions**

This Interpretation applies to the accounting for revenue and associated expenses by entities that undertake the construction of assets in exchange transactions directly or through subcontractors. The construction of assets entered into by entities where funding to support the construction activity will be provided by an appropriation or similar allocation of general government revenue or by aid or grant funds are excluded from the scope of this Interpretation of the Standards of GRAP.

Agreements in the scope of this Interpretation of the Standards of GRAP are agreements for the construction of assets in exchange transactions. In addition to the construction of assets in exchange transactions, such agreements may include the delivery of other goods or services.

The Interpretation of the Standards of GRAP addresses two issues:

- Is the agreement within the scope of the Standard of GRAP on Construction Contracts (as revised in 2010) or the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010)?
- When should revenue from the construction of assets in exchange transactions be recognised?

The effective date of the Interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 9: Distributions of Non-cash Assets to Owners**

This Interpretation of the Standards of GRAP applies to the following types of non-reciprocal distributions of assets by an entity to its owners acting in their capacity as owners:

- distributions of non-cash assets (e.g. items of property, plant and equipment, entity combinations as defined in the Standard of GRAP on Entity Combinations, ownership interests in another entity or disposal groups as defined in the Standard of GRAP on Non-current Assets Held for Sale and Discontinued Operations (as revised in 2010)); and
- distributions that give owners a choice of receiving either non-cash assets or a cash alternative.

This Interpretation of the Standards of GRAP applies only to distributions in which all owners of the same class of residual interests are treated equally.

This Interpretation of the Standards of GRAP does not apply to a distribution of a non-cash asset that is ultimately controlled by the same party or parties before and after the distribution. This exclusion applies to the separate, individual and consolidated financial statements of an entity that makes the distribution.

This Interpretation of the Standards of GRAP does not apply when the non-cash asset is ultimately controlled by the same parties both before and after the distribution. The Standard of GRAP on Entity Combinations states that 'A group of individuals shall be regarded as controlling an entity when, as a result of binding arrangements, they collectively have the power to govern its financial and operating policies so as to obtain benefits from its activities.' Therefore, for a distribution to be outside the scope of this Interpretation of the Standards of GRAP on the basis that the same parties control the asset both before and after the distribution, a group of individual owners receiving the distribution must have, as a result of binding arrangements, such ultimate collective power over the entity making the distribution.

This Interpretation of the Standards of GRAP does not apply when an entity distributes some of its ownership interests in a controlled entity but retains control of the controlled entity. The entity making a distribution that results in the entity recognising a minority interest in its controlled entity accounts for the distribution in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements.

This Interpretation of the Standards of GRAP addresses only the accounting by an entity that makes a non-cash asset distribution. It does not address the accounting by owners who receive such a distribution.

When an entity declares a dividend or similar distribution and has an obligation to distribute the assets concerned to its owners, it must recognise a liability for the dividend or similar distribution payable. Consequently, this Interpretation of the Standards of GRAP addresses the following issues:

- When should the entity recognise the dividend or similar distribution payable?

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

- How should an entity measure the dividend or similar distribution payable?
- When an entity settles the dividend or similar distribution payable, how should it account for any difference between the carrying amount of the assets distributed and the carrying amount of the dividend or similar distribution payable?

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 10: Assets Received from Customers**

This Interpretation of the Standards of GRAP applies to the accounting for the receipt of items of property, plant and equipment by entities that receive such assets from their customers.

Agreements within the scope of this Interpretation of the Standards of GRAP are those in which an entity receives from a customer an item of property, plant and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services, or to do both.

This Interpretation of the Standards of GRAP also applies to agreements in which an entity receives cash from a customer when that amount of cash must be used only to construct or acquire an item of property, plant and equipment and the entity must then use the item of property, plant and equipment either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services, or to do both.

This Interpretation of the Standards of GRAP does not apply to agreements in which the receipt occurs as part of a non-exchange transaction as defined in the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), or infrastructure used in a public-private partnership agreement (see the Guideline on Accounting for Public-private Partnerships), or assets received in a transfer of functions.

The Interpretation of the Standards of GRAP addresses the following issues:

- Is the definition of an asset met?
- If the definition of an asset is met, how should the received item of property, plant and equipment be measured on initial recognition?
- If the item of property, plant and equipment is measured at fair value on initial recognition, how should the resulting credit be accounted for?
- How should the entity account for a receipt of cash from its customer?

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 13: Operating Leases – Incentives**

In negotiating a new or renewed operating lease, the lessor may provide incentives for the lessee to enter into the agreement. Examples of such incentives are an up-front cash payment to the lessee or the reimbursement or assumption by the lessor of costs of the lessee (such as relocation costs, leasehold improvements and costs associated with a pre-existing lease commitment of the lessee). Alternatively, initial periods of the lease term may be agreed to be rent free or at a reduced rent.

The issue is how incentives in an operating lease should be recognised in the financial statements of both the lessee and the lessor.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

#### **IGRAP 14: Evaluating the Substance of Transactions Involving the Legal Form of a Lease**

An entity may enter into a transaction or a series of structured transactions (an arrangement) with an unrelated party or parties (an investor) that involves the legal form of a lease. For example, an entity may lease assets to an investor and lease the same assets back, or alternatively, legally sell assets and lease the same assets back. The form of each arrangement and its terms and conditions can vary significantly. In the lease and leaseback example, it may be that the arrangement is designed to achieve a tax advantage for the investor that is shared with the entity in the form of a fee, and not to convey the right to use an asset.

When an arrangement with an investor involves the legal form of a lease, the issues are:

- how to determine whether a series of transactions is linked and should be accounted for as one transaction;
- whether the arrangement meets the definition of a lease under the Standard of GRAP on Leases (as revised in 2010); and, if not,
  - whether a separate investment account and lease payment obligations that might exist represent assets and liabilities of the entity;
  - how the entity should account for other obligations resulting from the arrangement; and
  - how the entity should account for a fee it might receive from an investor.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **IGRAP 15: Revenue – Barter Transactions Involving Advertising Services**

An entity (seller) may enter into a barter transaction to provide advertising services in exchange for receiving other services from its customer (customer). Advertisements may be displayed on the Internet or poster sites, broadcast on the television or radio, published in magazines or journals, or presented in another medium. An example could be where a municipality offers advertising services to local businesses in its community newsletters in exchange for repairs and maintenance services provided by those businesses. These repair and maintenance services may, for example, take the form of repairing and maintaining office buildings or motor vehicles owned by the municipality.

In some cases, no cash or other consideration is exchanged between the entities. In some other cases, equal or approximately equal amounts of cash or other consideration are also exchanged.

A seller that provides advertising services in the course of its ordinary activities recognises revenue under the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010) from a barter transaction involving advertising when, amongst other criteria, the services exchanged are dissimilar in terms of paragraph .18 in the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010) and the amount of revenue can be measured reliably in terms of paragraph .20(a) in the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010). This Interpretation of the Standards of GRAP only applies to an exchange of dissimilar services. An exchange of similar advertising services is not a transaction that generates revenue under the Standard of GRAP on Revenue from Exchange Transactions (as revised in 2010).

The issue is under what circumstances can a seller reliably measure revenue at the fair value of advertising services received or provided in a barter transaction.

The effective date of the interpretation is for years beginning on or after 01 April 2011.

The municipality has adopted the interpretation for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 1 (as revised 2010): Presentation of Financial Statements**

The revision resulted in various terminology and definition changes.

Additional commentary has been added, describing the purpose of financial statements in the public sector.

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

Commentary has been added to explain that where legislation requires a departure from a particular Standard of GRAP and that departure is material, entities cannot claim compliance with the Standards of GRAP.

Additional disclosure requirements have been added regarding the following areas: assets and liabilities included in disposal groups classified as held for sale, biological assets, deferred tax assets (liabilities), tax expense, post-tax surplus or deficit and the use of transitions provision in the accounting policy.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 2 (as revised 2010): Cash Flow Statements**

The revision resulted in various terminology and definition changes.

Operating cash flows:

- Where an entity is in the business of renting and subsequently selling the same assets, these cash flows should be regarded as operating rather than investing cash flows.

Investing cash flows:

- Only expenditures incurred on a recognised asset qualify to be classified as investing activities in the cash flow statement.

Acquisitions and disposals of controlled entities and other operating units:

- Guidance relating to acquisitions and disposals of entities, particularly those on another basis of accounting, has been deleted.

Disclosure of undrawn borrowing facilities, restricted cash balances and the operating, investing and financing cash flows of jointly controlled entities accounted for using the proportionate consolidation method, now encouraged rather than required.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 3 (as revised 2010): Accounting policies, Changes in Accounting Estimates and Errors**

The revision resulted in various terminology and definition changes.

Paragraphs added to Changes in accounting policies

- A change from one basis of accounting to another basis of accounting is a change in accounting policy.
- A change in the accounting treatment, recognition or measurement of a transaction, event or condition within a basis of accounting is regarded as a change in accounting policy.

Selection of accounting policies

- The reference to the Accounting Practices Committee (APC) of SAICA has been deleted from paragraph .11 on the basis that it is not a standard setter and that entities would consider information from a wide range of sources in formulating an accounting policy and not just the pronouncements of the APC.
- Commentary on the selection of benchmark and alternative accounting policies has been deleted.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

---

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

#### **GRAP 4 (as revised 2010): The Effects of Changes in Foreign Exchange Rates**

Terminology changes:

Where reference has been made to the net realisable values of inventories, current replacement cost has also been included to allow for the appropriate valuation of inventories where they are distributed as part of a non-exchange transaction. Reference to 'trade' receivables has been amended to 'receivables'.

Monetary items:

Paragraph .15 clarifies that child support grants are 'payables', and not just 'obligations' in terms of the current requirements of the Standard of GRAP on Provisions, Contingent Liabilities and Contingent Assets (GRAP 19).

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 9 (as revised 2010): Revenue from Exchange Transactions**

The revision resulted in various terminology and definition changes.

Dividends or similar distributions declared from pre-acquisition surpluses:

Paragraph .36 has been amended to encompass not only securities, but any contributed capital.

Various amendments, deletions and additions to examples included in the appendix.

All amendments to be applied retrospectively

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 10 (as revised 2010): Financial Reporting in Hyperinflationary Economies**

Certain terminology changes:

- The reference to 'current cost' in paragraph .30 has been deleted.
- Where reference has been made to 'net realisable value', 'current replacement cost' has been added.

Net monetary position:

References to 'surplus' or 'deficit' have been changed, throughout the document, to 'gain' or 'loss'.

Interpretations:

Text included in this Standard of GRAP from IFRIC Interpretation 7 on Applying the Restatement Approach under IAS 29 Financial Reporting in Hyperinflationary Economies has been deleted.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 11 (as revised 2010): Construction Contracts**

The revision resulted in certain terminology changes:

---

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

#### **Other amendments:**

- An example has been added to clarify when an entity acts as a contractor in a construction contract arrangement.
- The example in paragraph .11 has been deleted as it is inappropriate for the South African public sector.
- The explanatory text relating to 'contractors' has been amended to clarify that an entity can be a contractor if it performs construction related activities itself or through subcontractors.

All amendments to be applied retrospectively

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 12 (as revised 2010): Inventories**

The revision resulted in various terminology and definition changes.

#### **Cost formulas:**

Paragraph .34 was amended and .35 was added to separate the principle from the exception when applying the cost formula for inventories with a similar nature and use to the entity.

#### **Recognition as an expense:**

Where reference has been made to 'net realisable value', 'current replacement cost' has been added.

#### **Fair value measurement:**

The appendix on how to determine fair value has been deleted.

All amendments to be applied retrospectively

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 13 (as revised 2010): Leases**

The revision resulted in various terminology and definition changes.

#### **Scope:**

Paragraph .04 has been included to clarify that this Standard does not apply to lease agreements to explore for or use natural resources such as oil, gas, timber, metals and other mineral rights and licensing agreements for such items as motion picture films, video recordings, plays, manuscripts, patents and copyrights.

#### **Non-current Assets Held for Sale and Discontinued Operations:**

Paragraph .51 has been added to clarify that finance lease assets classified as held for sale in accordance with the Standard of GRAP on Non-current Assets Held for Sale and Discontinued Operations shall be accounted for in accordance with that Standard.

#### **Guidance on accounting for finance leases by lessors:**

The paragraph (previously paragraph .53) that provided guidance on the recognition of assets where entities enter into arrangements with private sector entities has been deleted as the Guideline on Accounting for Public Private Partnerships supersedes this guidance.

#### **Guidance on operating lease incentives and substance over legal form:**

The guidance included in the original text on substance over legal form has been deleted.

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

Classification of leases on land and buildings elements:

The guidance on the classification of land and buildings has been amended to ensure that the element of the lease relating to the land is classified as a finance lease where significant risks and rewards have been transferred, despite there being no transfer of title, consistent with the general classification guidance.

All amendments to be applied retrospectively

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### GRAP 14 (as revised 2010): Events After the Reporting Date

Existence of a liability for dividends or similar distributions:

Paragraph .13 of GRAP 14 was amended to clarify that no liability exists at the reporting date for dividends or similar distributions declared after the reporting date.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### GRAP 16 (as revised 2010): Investment Property

The revision resulted in various terminology and definition changes.

Recognition of investment property:

- Additional commentary has been included in paragraph .19 and .20 to explain paragraph .18 that outlines the recognition criteria for investment property.
- This Standard includes investment property under construction as it was inconsistent with the requirement that investment property being redeveloped was still within the scope of this Standard, but not the initial development. As a result paragraphs .10 and .11 were amended, paragraphs .60 and .61 inserted, and paragraphs .25 and .65(e) of the original text deleted.
- The measurement principles were also amended accordingly to allow investment property under construction to be measured at cost if fair value cannot be measured reliably, until such time as the fair value can be measured reliably.
- Additional guidance has been included in the examples of investment property to clarify that the rentals earned do not have to be on a commercial basis or market related for the property to be classified as investment property.

Disclosure:

Entities are encouraged, rather than required, to disclose the fair value of investment property when this is materially different from the carrying amount.

Amendments to be applied as follow:

- Paragraphs .10(e), .54, .59, .62 and .65 were amended, paragraphs .60 and .61 were added and paragraph .25 and .11 (d) of the original text (2004) was deleted by the Improvements to GRAP issued in 1 April 2011. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 April 2011. If an entity elects to apply these amendments earlier, it shall disclose this fact. The related amendment to paragraph .05 in the Standard of GRAP on Property, Plant and Equipment is also applied earlier.
- Any other amendments to the Standards of GRAP shall be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

---

## **Notes to the Annual Financial Statements**

---

### **3. New standards and interpretations (continued)**

#### **GRAP 17 (as revised 2010): Property, Plant and Equipment**

The revision resulted in various terminology and definition changes.

**Scope:**

- The recognition and measurement of exploration and evaluation assets have been added to the scope exclusions.
- Investment properties under construction have been removed from the scope.

**Measurement at initial recognition:**

Paragraph .23 and .24 have been amended to clarify that the guidance applicable to determine fair value for revalued assets applies equally to the initial measurement of items of property, plant and equipment at fair value.

**Depreciable amount and depreciation period:**

An additional paragraph has been added to clarify that reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

**Derecognition:**

- The requirement to not classify gains from the disposal of property, plant and equipment as revenue, has been removed.
- Paragraph .79 has been added in line with the IASB Improvements Project to clarify that where assets are held for rental to others in the ordinary course of operations and the entity subsequently sells the assets, the Standard of GRAP on Non-current Assets Held for Sale and Discontinued Operations does not apply. Rather, these assets are to be transferred and treated in accordance with the Standard of GRAP on Inventories.

**Disclosures:**

- The required disclosures in paragraph .90 have been amended to encourage disclosures. Added to the list of encourage disclosures is the fair value disclosure of assets where the cost model is used.
- The requirement to disclose the cost basis for revaluated assets was removed.

**Amendments to be applied as follow:**

- Paragraphs .05, .23 and .24 were amended and paragraph .79 was added by the Improvements to GRAP issued in 1 April 2011. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 April 2011. If an entity elects to apply these amendments earlier, it shall disclose this fact.
- Any other amendments to the Standards of GRAP shall be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 19 (as revised 2010): Provisions, Contingent Liabilities and Contingent Assets**

The revision resulted in certain terminology changes.

**Social benefits:**

Paragraphs .08 and .16(a) clarify that social benefits due at year end are 'payables', as the amounts due are certain in terms of legislation.

**Binding agreements for restructurings:**

Paragraph .87 has been amended to clarify that restructurings may take place in the public sector in terms of directives, legislation or other means. These alternative means are enforceable and may give rise to an obligation.

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

#### Interpretations:

In developing the Standard initially, the Board included relevant text from any Interpretation that had been issued by the International Financial Reporting Interpretations Committee (IFRIC) relating to provisions, contingent liabilities and contingent assets. The Board included selected text from IFRIC 1 on Changes in Decommissioning, Restoration and Similar Liabilities and IFRIC 5 Rights to Interests Arising from Decommissioning, Restoration and Environmental Rehabilitation Funds in line with the Board's decisions. The Board concluded at its May 2008 meeting that it would issue any Interpretations as separate documents rather than dispersing the text of the Interpretations across various Standards. As a result, paragraphs .37 to .43, .74 to .80, and Appendix F of the previous version of GRAP 19, have been deleted.

All amendments to be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### GRAP 100 (as revised 2010): Non-current Assets Held for Sale and Discontinued Operations

The revision resulted in various terminology and definition changes.

#### Scope:

Paragraph .07 has been added to clarify the application of other Standards of GRAP to assets classified as non-current assets (or disposal groups) held for sale.

#### Plan to sell the controlling interest in a controlled entity:

- The Standard has been amended to clarify that an entity that is committed to a sales plan involving loss of control in a controlled entity shall classify all the assets and liabilities of that controlled entity as held for sale when the required criteria are met.
- The Standard has been amended to clarify that an entity that is committed to a sales plan involving loss of control of a controlled entity shall disclose the information required when the controlled entity is a disposal group that meets the definition of a discontinued operation.

#### Examples included in Appendix:

An additional example has been included regarding sale expected to be completed within one year.

#### Amendments to be applied as follow:

Paragraphs .13 and .42 were added by the Improvements to GRAP issued in 1 April 2011. An entity shall apply those amendments prospectively for annual periods beginning on or after 1 April 2011. If an entity elects to apply the amendments earlier, it shall disclose this fact.

- Any other amendments to the Standards of GRAP shall be applied retrospectively.

The effective date of the amendment is for years beginning on or after 01 April 2011.

The municipality has adopted the amendment for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### GRAP 105: Transfers of functions between entities under common control

The objective of this Standard is to establish accounting principles for the acquirer and transferor in a transfer of functions between entities under common control. It requires an acquirer and a transferor that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying the acquirer and transferor, Determining the transfer date, Assets acquired or transferred and liabilities assumed or relinquished, Accounting by the acquirer and transferor, Disclosure, Transitional provisions as well as the Effective date of the standard.

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality has adopted the standard for the first time in the 2012 annual financial statements.

The impact of the amendment is not material.

#### **GRAP 106: Transfers of functions between entities not under common control**

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after 01 April 2014.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

#### **GRAP 107: Mergers**

The objective of this Standard is to establish accounting principles for the acquirer in a transfer of functions between entities not under common control. It requires an entity that prepares and presents financial statements under the accrual basis of accounting to apply this Standard to a transaction or other event that meets the definition of a transfer of functions. It includes a diagram and requires that entities consider the diagram in determining whether this Standard should be applied in accounting for a transaction or event that involves a transfer of functions or merger.

It furthermore covers Definitions, Identifying a transfer of functions between entities not under common control, The acquisition method, Recognising and measuring the difference between the assets acquired and liabilities assumed and the consideration transferred, Measurement period, Determining what is part of a transfer of functions, Subsequent measurement and accounting, Disclosure, Transitional provisions as well as the Effective date of the standard.

The effective date of the standard is for years beginning on or after 01 April 2014.

The municipality expects to adopt the standard for the first time in the 2015 annual financial statements.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

#### **GRAP 20: Related parties**

The objective of this standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

## Notes to the Annual Financial Statements

---

### 3. New standards and interpretations (continued)

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
  - has control or joint control over the reporting entity;
  - has significant influence over the reporting entity;
  - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
  - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
  - both entities are joint ventures of the same third party;
  - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
  - the entity is controlled or jointly controlled by a person identified in (a); and
  - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2013.

The municipality expects to adopt the standard for the first time in the 2014 annual financial statements.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

### GRAP 20: Related Party Disclosures

The objective of the standard is to ensure that an entity's financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance.

Annual Financial Statements for the year ended 30 June 2012

## Notes to the Annual Financial Statements

### 3. New standards and interpretations (continued)

The municipality has adopted the standard for the first time once it becomes effective.

The impact of the standard is not material.

### 3.4 Standards and interpretations not yet effective or relevant

The following standards and interpretations have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2012 or later periods but are not relevant to its operations:

### GRAP 18: Segment Reporting

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance.

The municipality expects to adopt the standard for the first time once it becomes effective.

The adoption of this standard is not expected to impact on the results of the municipality, but may result in more disclosure than is currently provided in the annual financial statements.

### 4. Investment property

	2012			2011

Annual Financial Statements for the year ended 30 June 2012

## Notes to the Annual Financial Statements

Figures in Rand	2012	2011
-----------------	------	------

### 8. Employee benefit obligations

The amounts recognised in the statement of financial position are as follows:

Post - retirement medical aid benefit liability		
Post - retirement medical aid benefit liability	(18 741 783)	(16 520 682)
Amount to be provided for	(11 996 215)	(2 221 101)
<b>Net liability</b>	<b>(30 737 998)</b>	<b>(18 741 783)</b>

#### Key assumptions used

Calculations were made by management to estimate the initial recognition of a post - retirement medical aid benefit contribution to its employees and disclosed as a non - current liability.

Principals for calculation:

Estimated life expectancy - Men: 70 years of age

Estimated life expectancy - Women: 75 years of age

Remaining period for liability: From normal retirement age of 65

For pensioners already reached the age of 70 or 75, one year is added to the calculation of the benefit obligations.

Council contribution: 60% of the total contribution

Initial calculation:	2012	2011
Post - retirement medical aid benefit liability	30,737,998	18,741,783
Less: Provided during previous years	(18,741,783)	(16,520,682)
Amount to be provided	11,996,215	2,221,101

#### Defined contribution plan

It is the policy of the municipality to provide retirement benefits to all its employees. A number of defined contribution provident funds, all of which are subject to the Pensions Fund Act exist for this purpose.

The municipality is under no obligation to cover any unfunded benefits.

### 9. Inventories

Unsold water	542 652	476 149
Diesel at refuse dump site	75 487	18 498
Diesel at Breyten workshop	250 594	148 296

### Consumer debtors pledged as security

No consumer debtors were pledged as security during the previous or current financial years.

### Credit quality of consumer debtors

All of the municipality's trade and other receivables have been reviewed for indicators of impairment. The municipality continuously monitors consumers, identified group, average past payment history and incorporates this information into its credit risk control. No external credit rating is performed.

# Msukaligwa Local Municipality

Annual Financial Statements for the year ended 30 June 2012

## Notes to the Annual Financial Statements

Figures in Rand	2012	2011
-----------------	------	------

### 12. Consumer receivables (continued)

#### Fair value of consumer debtors

#### Consumer debtors past due but not impaired

Consumer debtors which are less than 3 months past due are not considered to be impaired. At 30 June 2012, R27 178 536 (2011: R24 810 013) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows:

Current	15 362 717	14 566 165
30 days	7 171 903	5 989 288
60 days	4 643 917	4 254 560

#### Consumer debtors impaired

As of 30 June 2012, consumer debtors of R214 596 222(2011: R188 574 842) were impaired and provided for.

The amount of the provision was R17 156 403 as of 30 June 2012 (2011: R15 410 979).

The ageing of these loans is as follows:

90 days	187 417 686	163 764 829
---------	-------------	-------------

The creation and release of provision for impaired receivables have been included in operating expenses in the statement of financial performance.

The maximum exposure to credit risk at the reporting date is the fair value of each class of loan mentioned above. The municipality does not hold any collateral as security.

	<u>8 628 573</u>	<u>7 862 375</u>

It is municipal policy to lease certain motor vehicles and equipment under finance leases.

The average lease term is 3-5 years and the average effective borrowing rate is 10% (2011: 10%).

Interest rates on some contracts are fixed, while others are linked to prime at the contract date. All leases have fixed repayments and no arrangements have been entered into for contingent rent.

The municipality's obligations under finance leases are secured by the lessor's charge over the leased assets.

### 38. Commitments

#### Authorised capital expenditure

##### Already contracted for but not provided for

• Property, plant and equipment	9 298 361	-
---------------------------------	-----------	---

The municipality had outstanding orders to the amount of R443,946 at year end. This committed expenditure will be financed by available bank facilities, retained surpluses and existing cash resources.

### 39. Contingencies

Litigation is in the process against the municipality relating to a dispute on unfair dismissal, cancelation of contracts, servitudes, lease contracts, improper sale of land, negligence, unauthorised lease of property, defrauding motor scheme and undue payment of R 3 027 153. The municipality's attorneys consider the estimate to be reasonable, although subject to a number of variables.

There is currently a dispute with the Department of Water Affairs on invoices to the amount of R2,930,760, which has not been paid by the municipality. These invoices were for water consumed by mines within the Msukaligwa Local Municipality's jurisdiction. The municipality were invoiced instead of the individual mines.

There exists a contingent asset of R6 173 148 as an insurance amount may be receivable from Alexander Forbes. The construction of an elevated tank for Wesselton had collapsed.

#### Statement of Financial Performance

Depreciation expense	-	2 646 103
Interest charged	-	325 706

### 41. Risk management

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Budgeted cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored. Surplus cash are held as short term deposits to assist in settling future commitments.

The table below analyses the municipality's financial liabilities (non-derivatives) into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

At 30 June 2012	Within 1 year	In second to fifth year inclusive	After 5 years	Carrying value

## Notes to the Annual Financial Statements

Figures in Rand	2012	2011
-----------------	------	------

### 41. Risk management (continued)

#### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's revenue and operating cash flows are substantially independent of changes in market interest rates.

At year end, financial instruments exposed to interest rate risk were as follows: Balances with banks.

#### Credit risk

Credit risk consists mainly of cash deposits, staff loans, cash equivalents, trade receivables and other receivables. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to consumers are settled mainly in cash. Management makes use of an independent attorney to assist in debt collection.

The municipality establishes an allowance for doubtful debt that represents its estimate of incurred credit losses in respect of trade and other receivables. All of the municipality's consumers were reviewed for indications of impairment and certain receivables were found to be impaired and an allowance for credit loss was provided for.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2012	2011
Cash and cash equivalents	32 570	32 570
Consumer debtors	89 028 806	79 679 295
Loans receivable	-	32 575

### 42. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

### 43. Events after the reporting date

The management of the municipality are not aware of any significant matter or circumstances arising since the end of the financial year to the date of this report in respect of matters which would require adjustments to or disclosure in the annual financial statements.

### 44. Unauthorised expenditure

Opening balance	17 802 896	-
Add: Unauthorised expenditure - current year	-	17 802 896
Less: Amounts not recoverable ( but condoned)	(17 802 896)	-

### 45. Additional disclosure in terms of Municipal Finance Management Act (continued)

In terms of section 36 of the Municipal Supply Chain Management Regulations various deviations from the Supply Chain Management Policy has been approved and submitted to Council on a monthly report in terms of subsection 36(2) of the policy and approved accordingly. Details are as follows:

NAME OF SUPPLIER	AMOUNT	REASON
DIMAG	R4 007.85	Test and repair submersible sewage pump over weekend at Ext 32 due to the fact that own Electricians were busy with other call-outs.
TWENTY FOUR MOTORS	R1 648.00	Ford Bantam registered BXP 616 MP is taken to Agents to repair road sensor valve. The vehicle is still under warranty at 42 000 kilometer.
SIZANAYE ELECTRICAL	R72 728.00	There was a breakdown in Lothair, more than 100 households were without electricity. Sizanaye Electrical was the only supplier that could deliver within 48 hours. Quotations from other suppliers quoted they could deliver within 2 weeks.
WERNER PUMPS SOUTH AFRICA	R131 265.00	Werner high pressure pump registered DBD 339 MP is broken. The pump can only be repaired by the Agents Werner Pumps. It is a strip and quote.
BELL EQUIPMENT SALES	R20 247.90	Oil tester for Bell trailer registered DKV 024 MP is only supplied by the agents Bell Equipment sales.
MTSWENI / ELS CONSTRUCTION	R86 585.00	To rectify sewer network in ext 32 in order to prevent sewer spillages inside the surrounding dwellings and to reduce the amount of sewer blockages in this area.
ALTIMAX	R372 500.00	Request to deviate from following the normal procurement processes of advertising for 21 days and to go on close tender to the suppliers on Council's database to compile GRAP compliant Annual Financial Statements.
BABCOCK EQUIPMENT	R6 405.36	Service kit for Grader Volvo registered DND 134 MP is supplied by Agents only.
BABCOCK EQUIPMENT	R19 131.15	Service kit for TLB Volvo registered DDL 750 MP is only available at the Agents only. Teeth and lock are also supplied by the Agents only.
BABCOCK EQUIPMENT	R24 541.00	Turbo charger and seals for Volvo TLB registered DDL 780 MP are only supplied by the Agents Babcock Equipment.
BABCOCK EQUIPMENT	R3 533.99	Service kit for payload Volvo registered DSJ092 MP is only available at the Agents only.
BREYTEN UNDERTAKERS	R1 500.00	Burial of pauper that have been staying in a mortuary for more than 21 days without identification according to the pauper and indigent policy of Msukaligwa – LM1075/03/2011.
WORKSHOP ELECTRONICS	R14 596.06	Workshop electronics is the sole supplier as prescribed by SANS 10216.
WORKSHOP ELECTRONICS	R8 327.20	Workshop electronics is the sole supplier as prescribed by SANS 10216.
BOTJHENG WATER	R34 016.46	Water pressure too high for mechanical rake at sewage plant and must be reduced. Botjheng did the installation of rake and upgrading of plant. Pressure reducing valve was not in the scope of work.
BGM SECURITY PRINTERS	R6 559.45	Blank cheques were ordered from council bankers and they requested that we pay their printers directly. They also mentioned that they use only one printer for all their water mark cheques.
ACSU SECURITY	R2 740.00	Repair of the alarms system of Library and Acsu is having contract with the Municipality. They are monitoring the alarm system within our Municipality.
KONKE-KULUNGILE PROJECTS	R145 800.00	Urgent repairs to the galvanized pipeline at the reservoir as the leaks constantly damages the

<b>45. Additional disclosure in terms of Municipal Finance Management Act (continued)</b>			
THE BADGE COMPANY	R1 561.80	computer network infrastructure. The Badge company is the sole manufacturer and supplier of emblems and logo's. Sole provider.	
DRAGGER SA	R3 612.66	Dragger S.A. is the sole provider for repairs, maintenance and calibrations of the Dragger 7110.	
SPRAY AIR SERVICES	R5 488.08	The Paint Machine that is used by Council is the product of Spray Air Services and they are the only company that repairs their products and keeps spares. There is no other supplier that can repair spray air machines.	
ERMELO NISSAN	R1 569.02	The vehicle was taken to Nissan who is the only agent in Ermelo to give a quote to repair it. The vehicle was stripped by the agent to establish what needs to be serviced and repaired. If a second quote must be obtained Council will have to pay for the labour for stripping and assembling, this will result in additional costs to be paid. Vehicle: NISSAN LDV – CTD599MP – FLEET#F202006	
SOUTHERN FAULT LOCATION	R26 505.00	The cable locator machine is damaged, an analog seism phone with a microphone is required to repair this machine. Southern Africa Fault Location is the only company that has this equipment available as they are the manufactures.	
MARCE FIRE FIGHTING TECHNOLOGY	R1 798.41	Marce Fire Fighting Technology is the official and sole dealer for E-One Fire engines in Africa. See attached letter.Vehicle: E-One GMC, BKP 681 MP, Fleet # F202002, Km 63124	
OTIS	R281 074.00	OTIS is the installer and the servicer of the elevator used in the Ermelo Civic Centre since the lift was installed in 1976. The lift is urgently needed to ensure accessibility to other levels of the building by the elderly and disabled persons. Heavy cleaning machines are transported by the lift to other levels of the Civic Centre.	
COMBO BUILDING SUPPLIES	R74 287.60	This material is urgently needed as there is no stock at the Municipal stores.	
BABCOCK EQUIPMENT	R12 735.14	Wheel bearings for Grader Volvo registration DND 134 MP are only supplied by Volvo BABCOCK Equipment.	
TWENTY FOUR MOTORS	R988.24	Car went for the 75 000 km service at Twenty Four Motors Ermelo. Car registration number is DXP 619 MP. Finance department. Vehicle make: Ford Bantam 1.3. Vehicle is still under guarantee, therefore the dealer must service the vehicle.	
BABCOCK EQUIPMENT	R15 849.12	Manifold gaskets for Grader Volvo registered DND 134 MP are only supplied by BABCOCK Equipment, they are the only Agents for Volvo plant.	
E S RESEARCH & TRAINING	R30 000.00	This is the only quotation we have received and the supplier will render the services as we had per specification. The service will include the following:	
CQS	R140 160.72	<ul style="list-style-type: none"> <li>• Facilitation of the summit</li> <li>• Compiling a consolidated report</li> </ul>	
		Prior year financial statements were prepared with the same system.	
ERMELO TOYOTA	R3680.19	To address Auditor-General audit queries in enabling Municipality to prepare AFS internally without consultants. Sole supplier of system.	
		Wiring on charging and fault finding, oil seal and no 4 coil pack was discovered faulty after stripping. The first quotation was used, it's for the Toyota RAV 4 Registration CNN 126 MP. Ermelo Toyota is the Agent.	
BABCOCK	R6 102.76	The service kit for Volvo Grader, registered DND 134 MP can only be supplied by BABCOCK equipment. BABCOCK is the only agents for Volvo

Note: A municipality should provide additional information on how a grant was spent per Vote. This excludes allocations from the Equitable Share.

# APPENDICES

## APPENDICES

Accessibility indicators	Explore whether the intended beneficiaries are able to access services or outputs.
Accountability documents	Documents used by executive authorities to give <i>“full and regular”</i> reports on the matters under their control to Parliament and provincial legislatures as prescribed by the Constitution. This includes plans, budgets, in-year and Annual Reports.
Activities	The processes or actions that use a range of inputs to produce the desired outputs and ultimately outcomes. In essence, activities describe <i>“what we do”</i> .
Adequacy indicators	The quantity of input or output relative to the need or demand.
Annual Report	A report to be prepared and submitted annually based on the regulations set out in Section 121 of the Municipal Finance Management Act. Such a report must include annual financial statements as submitted to and approved by the Auditor-General.
Approved Budget	The annual financial statements of a municipality as audited by the Auditor General and approved by council or a provincial or national executive.
Baseline	Current level of performance that a municipality aims to improve when setting performance targets. The baseline relates to the level of performance recorded in a year prior to the planning period.
Basic municipal service	A municipal service that is necessary to ensure an acceptable and reasonable quality of life to citizens within that particular area. If not provided it may endanger the public health and safety or the environment.
Budget year	The financial year for which an annual budget is to be approved – means a year ending on 30 June.
Cost indicators	The overall cost or expenditure of producing a specified quantity of outputs.
Distribution indicators	The distribution of capacity to deliver services.
Financial Statements	Includes at least a statement of financial position, statement of financial performance, cash-flow statement, notes to these statements and any other statements that may be prescribed.
General Key performance indicators	After consultation with MECs for local government, the Minister may prescribe general key performance indicators that are appropriate and applicable to local government generally.
Impact	The results of achieving specific outcomes, such as reducing poverty and creating jobs.
Inputs	All the resources that contribute to the production and delivery of outputs. Inputs are <i>“what we use to do the work”</i> . They include finances, personnel, equipment and buildings.
Integrated Development Plan (IDP)	Set out municipal goals and development plans.
National Key performance areas	<ul style="list-style-type: none"> <li>• Service delivery &amp; infrastructure</li> <li>• Economic development</li> <li>• Municipal transformation and institutional development</li> </ul>

# APPENDICES

	<ul style="list-style-type: none"> <li>• Financial viability and management</li> <li>• Good governance and community participation</li> </ul>
Outcomes	The medium-term results for specific beneficiaries that are the consequence of achieving specific outputs. Outcomes should relate clearly to an institution's strategic goals and objectives set out in its plans. Outcomes are "what we wish to achieve".
Outputs	The final products, or goods and services produced for delivery. Outputs may be defined as "what we produce or deliver". An output is a concrete achievement (i.e. a product such as a passport, an action such as a presentation or immunization, or a service such as processing an application) that contributes to the achievement of a Key Result Area.
Performance Indicator	Indicators should be specified to measure performance in relation to input, activities, outputs, outcomes and impacts. An indicator is a type of information used to gauge the extent to which an output has been achieved (policy developed, presentation delivered, service rendered)
Performance Information	Generic term for non-financial information about municipal services and activities. Can also be used interchangeably with performance measure.
Performance Standards:	The minimum acceptable level of performance or the level of performance that is generally accepted. Standards are informed by legislative requirements and service-level agreements. Performance standards are mutually agreed criteria to describe how well work must be done in terms of quantity and/or quality and timeliness, to clarify the outputs and related activities of a job by describing what the required result should be. In this EPMDS performance standards are divided into indicators and the time factor.
Performance Targets:	The level of performance that municipalities and its employees strive to achieve. Performance Targets relate to current baselines and express a specific level of performance that a municipality aims to achieve within a given time period.
Service Delivery Budget Implementation Plan	Detailed plan approved by the mayor for implementing the municipality's delivery of services; including projections of the revenue collected and operational and capital expenditure by vote for each month. Service delivery targets and performance indicators must also be included.
Vote:	<p>One of the main segments into which a budget of a municipality is divided for appropriation of money for the different departments or functional areas of the municipality. The Vote specifies the total amount that is appropriated for the purpose of a specific department or functional area.</p> <p>Section 1 of the MFMA defines a "vote" as:</p> <p><i>a) one of the main segments into which a budget of a municipality is divided for the appropriation of money for the different departments or functional areas of the municipality; and</i></p> <p><i>b) which specifies the total amount that is appropriated for the purposes of the department or functional area concerned</i></p>
